Aided Derbforgaill "The Violent Death of Derbforgaill" : A Critical Edition with Introduction, Translation and Textual Notes Kicki Ingridsdotter,2009 This dissertation contains a critical edition of the early Irish tale Aided Derbforgaill the violent death of Derbforgaill. It includes an introduction discussing the main thematic components of the tale as well as intertextuality, transmission and manuscript relationship. The edition is accompanied by transcripts from the three manuscript copies of the tale and textual notes. Aided Derbforgaill is an Ulster Cycle tale and belongs to a category of tales describing the death of prominent heroes, rarely heroines, in early Irish literature. Arriving in the shape of a bird to mate with the greatest of all heroes, Cú Chulainn, Derbforgaill is refused by Cú Chulainn on account of him having sucked her blood. Forced to enter a urination competition between women, and upon winning this, Derbforgaill is mutilated by the other competitors. The tale ends with two poems lamenting the death of Derbforgaill. This very short tale is complex, not only in its subject matter, but in the elliptical language of the poetry. Thematically the tale is a combination of very common motifs found elsewhere in early Irish literature, such as the Otherworld, metamorphosis and the love of someone unseen, and some rare motifs that are almost unique to this tale, such as blood sucking and the urination competition. The text also have clear sexual overtones.

Fear and Crime in Latin America Lucía Dammert,2012 The feeling of insecurity is a little known phenomenon that has been only partially explored by social sciences. However, it has a deep social, cultural and economic impact and may even contribute to define the very structures of the state. In Latin America, fear of crime has become an important stumbling block in the region's process of democratization. Lucía Dammert proposes a unique theoretical perspective which includes a sociological, criminological and political analysis to understand fear of crime.

Food and Foodways in Italy from 1861 to the Present Emanuela Scarpellini,2016-04-29 Despite being a universal experience, eating occurs with remarkable variety across time and place: not only do we not eat the same things, but the related technologies, rituals, and even the timing are in constant flux. This lively and innovative history paints a fresco of the Italian nation by looking at its storied relationship to food.

Moral Education Émile Durkheim, 2012-04-30 The great French sociologist and philosopher Emile Durkheim is best known for his classic book *Suicide* (1897), a landmark in social psychology. Among his other major works is this study in the sociology of education, which features 18 lectures by an influential theorist who discusses his ideas on the school as the appropriate setting for moral education. The first element in developing a moral being, he maintains, is instilling a sense of discipline, followed by a willingness to behave in terms of the group's collective interest, and a sense of autonomy. Durkheim also examines discipline and the psychology of the child, discipline of the school and the use of punishment, altruism in the child, the influence of the school environment, and the teaching of science, aesthetics, and history. Perceptive and provocative, this volume abounds in valuable insights for teachers and others involved in education.

High-Growth Firms Arti Grover Goswami, Denis Medvedev, Ellen Olafsen, 2019-02-19 Remarkably, a small fraction of firms account for most of the job and output creation in high-income and developing countries alike. Does this imply that the path to enabling more economic dynamism lies in selectively targeting high-potential firms? Or would pursuing broad-based reforms that minimize distortions be more effective? Inspired by these questions, this book presents new evidence on the incidence, characteristics, and drivers of high-growth firms based on in-depth studies of firm dynamics in Brazil, Côte d'Ivoire, Ethiopia, Hungary, India, Indonesia, Mexico, South Africa, Thailand, Tunisia, and Turkey. Its findings reveal that high-growth firms are not only powerful engines of job and output growth but also create positive spillovers for other businesses along the value chain. At the same time, the book debunks several myths about policies to support firm dynamism that focus on outward characteristics, such as firm size, sector, location, or past performance. Its findings show that most firms struggle to sustain rapid rates of expansion and that the relationship between high growth and productivity is often weak. Consequently, the book calls for a shift toward policies that improve the quality of firm growth by supporting innovation, managerial skills, and firms' ability to leverage global linkages and agglomeration. To help policy makers structure policies that support firm growth, the book proposes a new ABC framework of growth entrepreneurship: improving Allocative efficiency, encouraging Business-to-business spillovers, and strengthening firm Capabilities. This book is the third volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers. 'Policy makers often get carried away by the disproportionate contributions of high-growth firms to job and output growth and commit to pursuing policies targeting the potential 'stars.' This book separates fact from fiction underpinning such interventions through a comprehensive analysis of high-growth firms across a range of developing countries, making a compelling argument that public policy to pick prospective winners is neither possible nor desirable. Policy makers would be wise to consult its arguments and policy advice when designing the next generation of policies to support the growth of firms.' William R. Kerr Professor of Business Administration, Harvard University; author of

The Gift of Global Talent: How Migration Shapes Business, Economy and Society 'How to ignite and sustain high firm growth has eluded both economic analysis and thought leaders in policy and business. Through its meticulous and thoughtful analysis, this important new book provides a tractable framework to guide policy to harness the growth and productivity potential of firms in the developing-country context.' David Audretsch Distinguished Professor and Director of the Institute for Development Strategies, Indiana University .

Productivity Revisited Ana Paula Cusolito,William F. Maloney,2018-12-21 Productivity has again moved to center stage in two critical academic and policy debates: the slowing of global growth amid spectacular technological advances, and developing countries' frustratingly slow progress in catching up to the technological frontier. Productivity Revisited brings together the new conceptual advances of 'second-wave' productivity analysis that have revolutionized the study of productivity, calling much previous analysis into question while providing a new set of tools for approaching these debates. The book extends this analysis and, using unique data sets from multiple developing countries, grounds it in the developing-country context. It calls for rebalancing away from an exclusive focus on misallocation toward a greater focus on upgrading firms and facilitating the emergence of productive new establishments. Such an approach requires a supportive environment and various types of human capital--managerial, technical, and actuarial--necessary to cultivate new transformational firms. The book is the second volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers.
