2021-05-18 Postmodern Crises collects previously published and yet unpublished Mark Lipovetsky's articles on Russian literature and film. Written in different years, they focus on cultural and aesthetic crises that, taken together, constitute the postmodern condition of Russian culture. The reader will find here articles about classic subversive texts (such as Nabokov's Lolita), performances (Pussy Riot), and recent, but also subversive, films. Other articles discuss such authors as Vladimir Sorokin, such sociocultural discourses as the discourse of scientific intelligentsia; post-Soviet adaptations of Socialist Realism, and contemporary trends of complex literature, as well as literary characters turned into cultural tropes (the Strugatsky's progressors). The book will be interesting for

teachers and scholars of contemporary Russian literature and culture; it can be used both in undergraduate and graduate courses. Postmodern Crises collects previously published and yet unpublished Mark Lipovetskys articles on Russian literature and film

2004 Camel husbandry is becoming increasingly important in the arid zones of Africa. The camel has long been the mainstay of pastoral societies due to its drought tolerance, reliable milk and meat supply and ability to feed on a wide variety of plants. In the last few years, however, camels are also seen more and more in semi-arid rangelands, especially where overgrazing has depleted the grasses and increased the relative importance of shrubs. In spite of this growing importance, research on camel was limited until the early seventies to studies on topics such as anatomy, physiology, behaviour and to a lesser extent disease. However, since the early eighties the interest of the research on camels has been growing. Most advances have been made in reproductive physiology, veterinary and in the biochemistry of milk, while practical oriented research on improving camel productivity by developing marketable products targeting small and middle enterprises regrettably received little attention. This book attempts to fill this gap. The authors have profound knowledge on use of the camel as milk and meat animal. This knowledge is based on results of

research work carried out in partnership with universities, camel farmers and pastoralists in Eastern African countries. The first part deals with chemical composition, technological properties, hygienic safety and quality control of camel milk. This is followed by the presentation of processing methods for different dairy products which should allow smallholder producers to process milk on farm or in centralised small scale dairy unit. In the second part special knowledge gained in slaughtering, deboning and processing of camels on-site over several years of long-term stays on the Ol Maisor Farm in Kenya is presented. During the development of camel meat products the authors set a great value on the keeping quality of the products as well as creating a wide range of product groups with low and high cost for the local market and a good shelf life. The book presents background information and recipes on the manufacture of camel milk and meat products and it is intended as a practical guide to professionals, government bodies and development agencies interested in building up small scale processing units for camel meat and milk products. It is hoped that it may also serve as a reference for extension personal working with camel herders, food scientists and students. The book is concerned entirely with the one-humped camel (*Camelus dromedarius*). The term camel should, therefore, be taken to refer to this species unless specifically stated otherwise. 2019-06-21 Religious heritage and sacred sites offer an opportunity for visitors to explore a community's cultural knowledge. However, it is important to consider the role of interpretation, meaning, experience and narrative. This book is a timely re-assessment of the increasing interconnections between the management of diversity and religious tourism, and secular spaces on a global stage. It explores key learning points from a range of contemporary case studies on religious and pilgrimage activity; these relate to ancient, sacred and emerging tourist destinations, and new forms of pilgrimage, faith systems and quasi-religious activities. By providing a conceptual framework, the book demonstrates the symbolism of sacred spaces within religious traditions and the relationships developed between them. It offers explanations on how to manage and communicate religious diversity and provides a solid overview of: Religious tourism as a tool for intercultural dialogue; Interpretation of religious heritage for tourism; Cross-cultural contacts. This book will provide a valuable resource for those researching and practising tourism management, pilgrimage and religious tourism. 2015-02-01 This volume is driven by the

conviction that the key to the establishment of stable liberal democracy anywhere in the world and, in this case, in Kosovo lies in the completion of three interrelated tasks: first, the creation of effective political institutions, based on the principle of the separation of powers (including the independence of the judiciary); second, the promotion of the rule of law; and, third, the promotion of civic values, including tolerance or ethnic/religious/sexual minorities, trust, and respect for the harm principle. In fact, there are problems across all three measures, including with judicial independence, with the rule of law, and with civic values. On the last of these, research findings show that the citizens of Kosovo rank extremely low on trust of other citizens, low on engagement in social organizations, and tolerance of gays, lesbians, and atheists, but high on trust in the political institutions of their country and in pride of their newly independent state. 2020-04-15 This book, translated from Italian, discusses the influence of Galileo on Hobbes' natural philosophy. In his *De motu, loco et tempore* or *Anti-White* (~ 1643), Thomas Hobbes describes Galileo as "the

greatest philosopher of all times", and in *De Corpore* (1655), the Italian scientist is presented as the one who "opened the door of all physics, that is, the nature of motion." The book gives a detailed analysis of Galileo's legacy in Hobbes's philosophy, exploring four main issues: a comparison between Hobbes' and Mersenne's natural philosophies, the Galilean Principles of Hobbes' philosophical system, a comparison between Galileo's momentum and Hobbes's *conatus*, and Hobbes' and Galileo's theories of matter. The book also analyses the role played by Marin Mersenne, in spreading Galileo's ideas in France, and as a discussant of Hobbes. It highlights the many aspects of Hobbes' relationship with Galileo: the methodological and epistemological elements, but also the conceptual and the lexical analogies in the field of physics, to arrive, finally, at a close comparison on the subject of the matter. From this analysis emerges a shared mechanical conception of the universe open and infinite, that replaces the Aristotelian cosmos, and which is populated by two elements only: matter and motion. This book translated from Italian discusses the influence of Galileo on Hobbes natural philosophy

2017-01-12 This volume, the result of four years of work performed by the combined research groups of Utrecht University (Faculty of Humanities) and the HU Utrecht University of Applied Sciences (Faculty of Education), focuses on the central theme of 'Normative Professionalization'. Drawing on a wide variety of scholars including Hannah Arendt, Gert Biesta, Harry Kunneman, Donald Schön and Chris Argyris, and engaging with professionalism, ethics, virtue and morality, this book builds the argument that learning to deal with complexity supports not only education but the personal development of teachers and the improvement of society and democracy as well. This volume presents research on a broad range of topics such as worldview education, co-teaching, moral authorship, traditional-reform perspectives on education,

the discourse on citizenship, teacher education, and the question how to link religion and education. The research chapters explain the theoretical lenses and methodological approaches which have been employed to get a grip on complexity. The results have been interpreted in light of the concepts of *amor complexitatis*, *amor complexitatis* and *dolor complexitatis*. Guided by detailed research accounts of worldview descriptions provided by students and teachers, this framework has been enriched with the notion of a *passio complexitatis*. In the concluding chapters, the book advocates for an improved balance between the normative and instrumental professionalization of teachers, in order to create space for the improvement of pedagogical relations and processes and to reintroduce the moral dimensions of education. The claim throughout this book is that allowing for complexity in education – even going so far as to embrace it – is vital for the improvement of education, and a prerequisite for more authentic relationships (on the micro level) and the maintenance of a well-functioning democracy and a balanced society (on the macro level). This book is of interest to researchers and educators who are interested in normative professionalization, to qualitative and practice oriented researchers, to teachers and managers in primary, secondary and professional education, and to the wider public which is concerned with the significance of education for the

development of a stable and sustainable society. This volume the result of four years of work performed by the combined research groups of Utrecht University Faculty of Humanities and the HU Utrecht University of Applied Sciences Faculty of Education focuses on the central theme of

2012 The importance of the free movement of persons and the proper functioning of the internal market, in particular concerning the availability of

mediation services in cross-border disputes, was an important point on the agenda of the European Directive 2008/52/EC of 21 May 2008 on certain aspects of mediation in civil and commercial matters. The European Mediation Training for Practitioners of Justice (EMTPJ) is an initiative of the Association for International Arbitration (AIA) and supported by the European Commission. It is an intensive mediation training that purports to create mediators specialized in cross border mediation. 2012-09-20 The Trans-Pacific Partnership (TPP) talks attempt to link together at least nine countries in three continents to create a 'high-quality, twenty-first century agreement'. Such an agreement is intended to open markets to competition between the partners more than ever before in sectors ranging from goods and services to investment, and includes rigorous rules in the fields of intellectual property, labour protection and environmental conservation. The TPP also aims to improve regulatory coherence, enhance production supply chains and help boost small and medium-sized enterprises. It could transform relations with regions such as Latin America, paving the way to an eventual Free Trade Area of

the Asia Pacific, or see innovations translated into the global trade regulatory system operating under the WTO. However, given the tensions between strategic and economic concerns, the final deal could still collapse into something closer to a standard, 'twentieth-century' trade agreement.
