2006 International human rights law is founded on the premise that all persons, by virtue of their essential humanity, should enjoy all human rights. Exceptional distinctions, for example between citizens and non-citizens, can be made only if they serve a legitimate State objective and are proportional to the achievement of the objective. Non-citizens can include: migrants,

refugees and asylum seekers, victims of trafficking, foreign students, temporary visitors and stateless people. This publication looks at the diverse sources of international law and emerging international standards protecting the rights of non-citizens, including international conventions and reports by UN and treaty bodies. 2012-10-02 The feeling of insecurity is a little known phenomenon that has been only partially explored by social sciences. However, it has a deep social, cultural and economic impact and may even contribute to define the very structures of the state. In Latin America, fear of crime has become an important stumbling block in the region's process of democratization. After long spells of dictatorships and civil wars, violence in the region was supposed to be under control yet crime rates have continued to skyrocket and citizens remain fearful. This analytical puzzle has troubled researchers and to date there is no publication which explores this problem. Based on a wealth of cutting edge qualitative and quantitative research, Lucía Dammert proposes a unique theoretical perspective which includes a sociological, criminological and political analysis to understand fear of crime. She describes its linkages to issues such as urban segregation, social attitudes,

institutional trust, public policies and authoritarian discourses in Chile's recent past. Looking beyond Chile, Dammert also includes a regional comparative perspective allowing readers to understand the complex elements underpinning this situation. Fear and Crime in Latin America challenges many assumptions and opens an opportunity to discuss an issue that affects everyone with key societal and personal costs. As crime rates increase and states become even more fragile, fear of crime as a social problem will continue to have an important impact in Latin America. 2009 This dissertation contains a critical edition of the early Irish tale Aided Derbforgaill the violent death of Derbforgaill. It includes an introduction discussing the main thematic components of the tale as well as intertextuality, transmission and manuscript relationship. The edition is accompanied by transcripts from the three manuscript copies of the tale and textual notes. Aided Derbforgaill is an Ulster Cycle tale and belongs to a category of tales describing the death of prominent heroes, rarely heroines, in early Irish literature. Arriving in the shape of a bird to mate with the greatest of all heroes, Cú Chulainn, Derbforgaill is refused by Cú Chulainn on

account of him having sucked her blood. Forced to enter a urination competition between women, and upon winning this, Derbforgaill is mutilated by the other competitors. The tale ends with two poems lamenting the death of Derbforgaill. This very short tale is complex, not only in its subject matter, but in the elliptical language of the poetry. Thematically the tale is a combination of very common motifs found elsewhere in early Irish literature, such as the Otherworld, metamorphosis and the love of someone unseen, and some rare motifs that are almost unique to this tale, such as blood sucking and the urination competition. The text also have clear sexual overtones. The tale ends with two poems lamenting the death of Derbforgaill This very short tale is complex not only in its subject matter but in the elliptical language of the poetry

2005-01-01 Advanced Training for Trainers in Europe (ATTE) is a part-time programme for trainers active in training youth multipliers. ATTE was implemented successfully as a pilot course from November 2001 to October 2003, involving 30 trainers from 21 countries; it is innovative in its approach, methodology, structure, long-term perspective and intensity. ATTE has been developed and organised within the Partnership Programme on European Youth Worker Training run by the European Commission and the Council of Europe. The Partnership Programme aims to contribute to quality in youth-worker training at European

level, with an emphasis on integrating European Citizenship in youth work. Volume 1 of this publication presents a full description of the ATTE training programme and its curriculum. 2006-06-04 Electromagnetic Compatibility of Integrated Circuits: Techniques for Low Emission and Susceptibility focuses on the electromagnetic compatibility of integrated circuits. The basic concepts, theory, and an extensive historical review of integrated circuit emission and susceptibility are provided. Standardized measurement methods are detailed through various case studies. EMC models for the core, I/Os, supply network, and packaging are described with applications to conducted switching noise, signal integrity, near-field and radiated noise. Case studies from different companies and research laboratories are presented with in-depth descriptions of the ICs, test set-ups, and comparisons between measurements and simulations. Specific guidelines for achieving low emission and susceptibility derived from the experience of EMC experts are presented. 2011-09-18 Today, indoor mold and moisture, and their associated health effects, are a society-wide problem. The economic consequences of indoor mold and moisture are enormous. Their global dimension has been emphasized in several recent international publications, stressing that the most important means for avoiding adverse

health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. This book aims to describe the fundamentals of indoor mold growth as a prerequisite to tackle mold growth in the existing building stock as well as in future energy efficient buildings. It brings together different disciplinary points of view on indoor mold, ranging from physics and material science to microbiology and health sciences. The contents have been outlined according to three main issues: Fundamentals, particularly addressing the crucial roles of water and materials, Health, including a state-of-the-art description of the health-related effects of indoor molds, and Strategies, integrating remediation, prevention and policies. This book aims to describe the fundamentals of indoor mold growth as a prerequisite to tackle mold growth in the existing building stock as well as in future energy efficient buildings

2024-12-12 CRASH! explores the fascinating, revealing, and surprising cultural impact of plane crashes across art, literature, music, media, and creative nonfiction. Plane crashes are covered extensively but they are not analyzed very deeply, beyond rote media reports and forensic accident investigations.

This is despite the voluminous, diverse, and fascinating cultural materials - poems and novels, songs, films, art, TV series, and on and on - that emerge in the wake of aviation disasters. Randy Malamud reanimates these tragic events and identifies how they persist and resonate through our culture-more than we might have imagined, and in intricately far-reaching ways. A unique and extraordinarily wide-ranging cultural examination, CRASH! takes the reader on a journey that includes reflections on flight phobia, themes of crash survival (with asides on Lord of the Flies, The Little Prince, and Ernest Hemingway's two-day two-crash adventure), the existentialism of pilots' last

words, the day the music died, deep dives into modernist plane wreck paintings, kamikaze pilots and their Zen death poems, plane crashes before planes, 'race, crash, and gender,' and the cultural aftermath of 9/11. Ultimately, Malamud shows that crashes do not bring about complete and total destruction: we accomplish some degree of restoration by shoring fragments against the ruins.
