2010-05-21 Published for the first time in the U.S. - one of the two diaries on which the

upcoming movie *The Motorcycle Diaries* is based - the moving and at times hilarious account of Che Guevara and Alberto Granado's eight-month tour of South America in 1952. In 1952 Alberto Granado, a young doctor, and his friend Ernesto Guevara, a 23-year-old medical student from a distinguished Buenos Aires family, decided to explore their continent. They set off from Córdoba in Argentina on a Norton 500cc motorbike traveled through Chile, Peru, Colombia, and Venezuela. The duo's adventures vary from the suspenseful (stowing away on a cargo ship, exploring Incan ruins) to the comedic (falling in love, drinking, fighting...) to the serious (volunteering as firemen and at a leper colony). They worked as day laborers along the way - as soccer coaches, medical assistants, and furniture movers. The poverty and exploitation of the native population started the process that was to turn Ernesto -

the debonair, fun-loving student - into Che, the revolutionary who had a profound impact on the history of several nations. Originally published in Spanish in Cuba in 1978, the first English translation was published by Random House UK in 2003. The movie, based on Granado's and Che's diaries, directed by Walter Salles (Central Station, Behind the Sun), was produced by Robert Redford and others. Shown at the Sundance Film Festival, it generated great reviews and a frenzied auction for distribution rights, which was won by Focus Features. Granado, now 82, was a consultant to Salles during the production. In 1952 Alberto Granado a young doctor and his friend Ernesto Guevara a 23 year old medical student from a distinguished Buenos Aires family decided to explore their continent

2012-11-09 After decades of stagnation, the size of Latin America's middle class recently expanded to the point where, for the first time ever, the number of people in poverty is equal to the size of the middle class. This volume investigates the nature, determinants and possible consequences of this remarkable process of social transformation. We propose an original definition of the middle class, tailor-made for Latin America, centered on the concept of economic security and thus a low probability of falling into poverty. Given our definition of the middle class, there are four, not three, classes in Latin America. Sandwiched between the poor and the middle class there

lies a large group of people who appear to make ends meet well enough, but do not enjoy the economic security that would be required for membership of the middle class. We call this group the 'vulnerable'. In an almost mechanical sense, these transformations in Latin America reflect both economic growth and declining inequality in over the period. We adopt a measure of mobility that decomposes the 'gainers' and 'losers' in society by social class of each household. The continent has experienced a large amount of churning over the last 15 years, at least 43% of all Latin Americans changed social classes between the mid 1990s and the end of the 2000s. Despite the upward mobility trend, intergenerational mobility, a better proxy for inequality of opportunity, remains stagnant. Educational achievement and attainment remain to be strongly dependent upon parental education levels. Despite the recent growth in pro-poor programs, the middle class has benefited disproportionately from social security transfers and are increasingly opting out from government services. Central to the region's prospects of continued progress will be its ability to harness the new middle class into a new, more inclusive social contract, where the better-off pay their fair share of taxes, and demand improved public services. This volume investigates the nature determinants and possible consequences of this remarkable process of social transformation

2013-03-21 From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be

survivors. 2012-03-07 Andy Kirkpatrick and Zhichang Xu offer a response to the argument that Chinese students' academic writing in English is influenced by "culturally nuanced rhetorical baggage that is uniquely Chinese and hard to eradicate." Noting that this argument draws from "an essentially monolingual and Anglo-centric view of writing," they point out that the rapid growth in the use of English worldwide calls for "a radical reassessment of what English is in today's world." The result is a book that provides teachers of writing, and in particular those involved in the teaching of English academic writing to Chinese students, an introduction to key stages in the development of Chinese rhetoric, a wide-ranging field with a history of several thousand years. Understanding this important rhetorical tradition provides a strong foundation for assessing and responding to the writing of this growing

2013-04-30 Unfurling like a medieval book of days, each page of Eduardo Galeano's *Children of the Days* has an illuminating story that takes inspiration from that date of the calendar year, resurrecting the heroes and heroines who have fallen off the historical map, but whose lives remind us of our darkest hours and sweetest victories. Challenging readers to consider the human condition and our own choices, Galeano elevates the little-known heroes of our world and decries the destruction of the intellectual, linguistic, and emotional treasures that we have all but forgotten. Readers will discover many inspiring narratives in this collection of vignettes: the Brazilians who held a smooch-in to protest against a dictatorship for banning kisses that undermined public morals; the astonishing day Mexico invaded the United States; and the sacrilegious women who had the effrontery to marry each other in a church in the Galician city of A Coruña in 1901. Galeano also highlights individuals such as Pedro Fernandes Sardinha, the first bishop of Brazil, who was eaten by Caete Indians off the coast of Alagoas, as well as Abdul Kassem Ismael, the grand vizier of Persia, who kept books safe from war by creating a

walking library of 117,000 tomes aboard four hundred camels, forming a mile-long caravan. Beautifully translated by Galeano's longtime collaborator, Mark Fried, *Children of the Days* is a majestic humanist treasure that shows us how to live and how to remember. It awakens the best in us. 2004 The final decade of twentieth century was momentous for Latin America, as it witnessed sweeping changes with regard to previous trends in the region. Most important were the revival of economic

growth and the reduction of poverty. Another significant phenomenon was impact of international crises on Latin American countries. This book analyzes what happened between 1990 and 1999 and revisits issues of interest to ECLAC, using the same approach that has characterized the *Social Panorama of Latin America*. Analysis begins with a look at poverty, income distribution, employment, occupational stratification, the role of education, the intergenerational transmission of opportunities for achieving well-being and the contribution of social spending to the improvement of the population's standard of living and at interrelationships between these dimensions and economic growth. It also uses opinion polls carried out in many of the countries to describe the Latin American population's subjective reactions changes in the 1990s-- Publisher's description. 2007-06-12 Since the mid-1960s, Alvin and Heidi Toffler have predicted the far-reaching impact of emerging technological, economic, and social developments on our businesses, governments, families, and daily lives. In REVOLUTIONARY WEALTH, they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future. REVOLUTIONARY WEALTH focuses on how wealth will be created—and who will get

it—in the twenty-first century. As the knowledge-based economy (a reality the Tofflers predicted forty years ago) continues to replace the industrial-based economy, they argue, money is no longer the sole determinate of wealth. The Tofflers explain that we are becoming a nation of “prosumers,” consuming what we ourselves produce, and argue that we have all taken on “third jobs”—work we unwittingly do without pay for some of the biggest corporations in the country. Using fascinating examples from our daily lives, they illustrate how our everyday activities—from parenting and volunteering to blogging, painting our houses, and improving our diets—contribute to a non-monetary economy that is largely hidden from economists. Writing with the same insight and clarity that made their earlier books bestsellers, the Tofflers present fresh, groundbreaking new ways of thinking about wealth. In REVOLUTIONARY WEALTH they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future

2019-11-06 This book offers an ultimate clinical guide to all the medical issues related to triathlon - a very popular Olympic and international sport, and the most modern of all the endurance activities. Triathletes experience a range of environmental conditions and physiological demands, depending on the race, that must be taken into consideration when preparing for

medical assistance. The book addresses in detail the topics of cardiovascular adaptations, overuse injuries, overtraining syndrome, endurance anaemia, nutrition and the physiological aspects associated with the discipline. It provides information on the training and technical aspects of the different distances in triathlon disciplines, with a special focus on safety in open-water swimming. Dedicated chapters also cover issues related to female, young, master and para-triathletes. Combining research perspectives with many years of experience practicing in the field, this book offers sport medicine physicians, orthopedists, physical therapists and coaches a comprehensive guide to the evaluation, treatment and prevention of all the overuse conditions and to improving athletes' performance. 2016-06-16 This path-breaking volume explores cultures of energy, the underlying

but under-appreciated dimensions of both crisis and innovation in resource use around the globe. Theoretical chapters situate pressing energy issues in larger conceptual frames, and ethnographic case studies reveal energy as it is imagined, used, and contested in a variety of cultural contexts. Contributors address issues including the connection between resource flows and social relationships in energy systems; cultural transformation and notions of progress and collapse; the blurring of technology and magic; social tensions that accompany energy contraction; and sociocultural changes required in affluent societies to reduce dependence on fossil fuels. Each of five thematic sections concludes with an integrative and provocative conversation among the authors. The volume is an ideal tool for teaching unique, contemporary, and comparative perspectives on social theories of science and technology in undergraduate and graduate courses.
