since this edition completed 7th May 2007.  
Field manual (FM) 3-04.203 presents  
information to plan and conduct common  
aviation tasks for fixed- and rotary-wing  
flight. However, it has become more  
inclusive and its scope broadened to reduce  
the number of manuals used by Army  
crewmembers for reference. One of the  
underlying premises of Army aviation is if  
crewmembers understand 'why' they will be  
better prepared to 'do' when confronted with  
the unexpected. FM 3-04.203 endeavors to  
ensure that crewmembers understand the  
basic physics of flight, and the dynamics  
associated with fixed- and rotary-wing  
aircraft. A comprehensive understanding of  
these principles will better prepare a crew  
member for flight, transition training, and  
tactical flight operations. This is the current
