2013-12-04 Developing Reading Comprehension "In recent years the debate about teaching young children to read has tended to focus upon equipping them with the crucially important knowledge and skills they need to read words accurately in and out of context, that is to say, teaching them how the alphabet works for reading and spelling. While such knowledge and skills are essential, more is required for children to become literate, fluent readers who understand what they read. In short, the goal of reading is comprehension. This book scrupulously examines the obstacles to

reading comprehension and exemplifies what can be done to help children overcome them. It is an important and timely contribution to securing high-quality teaching of the range of attributes children need to become fully-fledged readers.” Sir Jim Rose, CBE “The studies by Professors Charles Hulme and Maggie Snowling and their team over two decades based around the Reading Intervention Programme are the most sustained, comprehensive and rigorous research series on reading yet conducted in the UK. Their increasing focus on children who experience the most difficulty in reading is exactly where attention should be directed. This volume summarises the team’s achievements to date, and is most eagerly awaited.” Greg Brooks, Emeritus Professor of Education, University of Sheffield, Member of European High Level Group of Experts on Literacy “Developing Reading Comprehension presents a landmark study from the top research team in the UK on how to improve reading comprehension. It’s an exemplary masters-level textbook written with undergraduate-level lucidity and approachability.” Colin Harrison, Emeritus Professor of Literacy Studies in Education, University of Nottingham A significant minority of children aged 7-11, despite being able to read fluently and accurately, have difficulty extracting meaning from text. This detailed guide offers three evidence-based intervention programmes, drawn from the cutting edge of educational psychology, for improving the reading skills of children in this

group. It includes a definitive introduction to the characteristics of the ‘poor comprehender profile’, and explains how to monitor and assess students’ experiences and learning outcomes. With invaluable strategies for teachers, psychologists and special educational needs coordinators, the book will help professionals to support learners in their efforts to explore the full richness of language and to read with real understanding. 2016-12-31 Life and Death in Asia Minor combines contributions in both archaeology and bioarchaeology in Asia Minor in the period ca. 200 BC - AD 1300 for the first time. The archaeology topics are wide-ranging including death and territory, death and landscape perception, death and urban transformations from pagan to Christian topography, changing tomb typologies, funerary costs, family organization, funerary rights, rituals and practices among pagans, Jews, and Christians, inhumation and Early Byzantine cremations and use and reuse of tombs. The bioarchaeology chapters use DNA, isotope and osteological analyses to discuss, both among children and adults, questions such as demography and death rates, pathology and nutrition, body actions,

genetics, osteobiography, and mobility patterns and diet. The areas covered in Asia Minor include the sites of Hierapolis, Laodikeia, Aphrodisias, Tlos, Ephesos, Priene, Kyme, Pergamon, Amorion, Gordion, Boğazkale, and Arslantepe. The theoretical and methodological approaches used make it highly relevant for people working in other geographical areas and time periods. Many of the articles could be used as case studies in teaching at schools and universities. An important objective of the publication has been to see how the different types of results emerging from archaeological and natural science studies respectively could be integrated with each other and pose new questions on ancient societies, which were far more complex than historical and social studies of the past often manage to transmit. The theoretical and methodological approaches used make it highly relevant for people working in other geographical areas and time periods. Many of the articles could be used as case studies in teaching at schools and universities.

Isaac, Winslow, and Henry Knox Hall acquired their shipbuilding training at the center of America's boatbuilding industry in Cohasset, Massachusetts, during the 1840s. Following the Gold Rush of 1849, Winslow Hall migrated to San Francisco. In 1863, he built the Sarah Louise, which was the first Hall

vessel to be launched from the West Coast. Eleven years later, the Hall Brothers Shipyard was established at Port Ludlow in the Washington Territory. In 1881, the shipyard was moved to Port Blakely on Bainbridge Island. From the launching of the Annie Gee in 1874 to their last ship, the five-masted schooner George E. 2017-04-07 This volume focuses on apoptotic and non-apoptotic programmed cell death, including necroptosis, pyroptosis, and ferroptosis, and presents recent findings in the field. It discusses the crucial role that apoptotic and non-apoptotic cell death play in various pathological conditions, such as skin diseases, inflammatory bowel diseases, and virus infections. Further, it highlights the mechanisms underlying the recognition and clearance of dead cells, and the subsequent biological responses triggered by phagocytosed macrophages and factors released from dying cells. Offering insights into cell death, it is a valuable resource for researchers and clinicians developing novel strategies to treat various diseases that are closely associated with cell death. 2019-11-30 This ambitious work offers a transnational account of the deity Shinra Myōjin, the “god of Silla” worshipped in medieval Japanese Buddhism from the eleventh to sixteenth centuries. Sujung Kim challenges the long-held understanding of Shinra Myōjin as a protective deity of the Tendai Jimon school, showing how its worship emerged and developed in the complex networks of the East Asian “Mediterranean”—a “quality” rather than a physical space defined by Kim as the primary conduit for cross-cultural influence in a region that includes the Yellow Sea, the Sea of Japan (East Sea), the East China Sea, and neighboring coastal areas. While focusing on the transcultural worship of the deity, Kim engages the different maritime arrangements in which Shinra Myōjin circulated: first, the network of Korean immigrants, Chinese merchants, and Japanese Buddhist monks in China’s Shandong peninsula and Japan’s Ōmi Province; and second, that of gods found in the East Asian Mediterranean. Both of these networks became nodal points of exchange

of both goods and gods. Kim's examination of temple chronicles, literary writings, and iconography reveals Shinra Myōjin's evolution from a seafaring god to a multifaceted one whose roles included the god of pestilence and of poetry, the insurer of painless childbirth, and the protector of performing arts. Shinra Myōjin and Buddhist Networks of the East Asian "Mediterranean" is not only the first monograph in any language on the Tendai Jimon school in Japanese Buddhism, but also the first book-length study in English to examine Korean connections in medieval Japanese religion. Unlike other recent studies on individual Buddhist deities, it foregrounds the need to approach them within a broader East Asian context. By shifting the paradigm from a land-centered vision to a sea-centered one, the work underlines the importance of a transcultural and interdisciplinary approach to the study of Buddhist deities. This ambitious work offers a transnational account of the deity Shinra My jin the god of Silla worshipped in medieval Japanese Buddhism from the eleventh to sixteenth centuries
