2012-12-06 Lake Titicaca, because of its area and volume and its situation at high altitude within the tropics, is a unique hydrological site in the world. It should be noted that it stands at the transition point between two very distinct geographical regions: the desert fringe of the Pacific coast

to the west and the great Amazonian forest extending to the Atlantic coast to the east. Many scientists have been attracted to the lake in the past because of its unusual limnological features. In this book the editors have compiled an exhaustive review of current knowledge from the existing literature and from the results of more recent observations. It is certain that this book will become the essential reference work for scientists wanting to make progress in revealing the lake's secrets. It can be stated unequivocally that this work constitutes a complete review of the present state of knowledge on Lake Titicaca and that it provides the latest results of research on this habitat. 2009-02-05 Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible. Why do people work hard and take pride in what they do

2002-02-22 Essays on photography and the medium's history and evolving identity. In Each Wild Idea, Geoffrey Batchen explores a wide range of photographic subjects, from the timing of the medium's invention to the various implications of cyberculture. Along the way, he reflects on contemporary art photography, the role of the vernacular in photography's history, and the Australianness of Australian photography. The essays all focus on a consideration of specific photographs—from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz. Although Batchen views each photograph within the context of broader social and political forces, he also engages its own distinctive formal attributes. In short, he sees photography as something that is simultaneously material and cultural. In an effort to evoke the lived experience of history, he frequently relies on sheer description as the mode of analysis, insisting that we look right at—rather than beyond—the photograph being discussed. A constant theme throughout the book is the question of photography's past, present, and future identity. 2010-07-05 Mexican conservationists have sometimes observed that it is difficult to find a country less interested in the conservation of its natural resources than is Mexico. Yet, despite a long history dedicated to the pursuit of development regardless of its environmental consequences, Mexico has an equally long, though much less developed and appreciated, tradition of environmental conservation. Lane Simonian here offers the first panoramic history of conservation in Mexico from pre-contact times to the current Mexican environmental movement. He explores the origins of conservation and environmental concerns in Mexico, the philosophies and endeavors of Mexican conservationists, and the enactment of important conservation laws and programs. This heretofore untold story, drawn from interviews with leading Mexican conservationists as well as archival research, will be important reading throughout the international community of activists, researchers, and concerned citizens interested in the intertwined issues of conservation and development. 2006 Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health

and development issue, perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels. The first great novel of Spanish America (The Times Literary Supplement) • Winner of the National Book Award for Translation in 1967, translated by Gregory Rabassa Horacio Oliveira is an Argentinian writer who lives in Paris with his mistress, La Maga, surrounded by a loose-knit circle of bohemian friends who call themselves the Club. A child's death and La Maga's disappearance put an end to his life of empty pleasures and intellectual

acrobatics, and prompt Oliveira to return to Buenos Aires, where he works by turns as a salesman, a keeper of a circus cat which can truly count, and an attendant in an insane asylum. Hopscotch is the dazzling, freewheeling account of Oliveira's astonishing adventures. 1999-03-15 In an 1828 letter to his partner, Nicéphore Niépce, Louis Daguerre wrote, I am burning with desire to see your experiments from nature. In this book, Geoffrey Batchen analyzes the desire to photograph as it emerged within the philosophical and scientific milieus that preceded the actual invention of photography. Recent accounts of photography's identity tend to divide between the postmodern view that all identity is determined by context and a formalist effort to define the fundamental characteristics of photography as a medium. Batchen critiques both approaches by way of a detailed discussion of photography's conception in the late eighteenth and early nineteenth centuries. He examines the output of the various nominees for first photographer, then incorporates this information into a mode of historical criticism informed by the work of Michel Foucault and Jacques Derrida. The result is a way of

thinking about photography that persuasively accords with the medium's undeniable conceptual, political, and historical complexity. 2011-08 En este libro analizaremos los usos fotograficos y sus funciones sociales como elementos comunicativos, veremos los principales proyectos fotograficos y estudiaremos la realizacion de imagenes para la transmision de conocimiento y sensaciones hipervisuales. Veremos como se interpretan las imagenes fijas en el mundo contemporaneo para saber llevar a cabo un trabajo fotografico propio, original y guiado. Decia Henri Cartier-Bresson que fotografiar es colocar la cabeza, el ojo y el corazon en un mismo eje. Rondaba por las calles todo el dia y me sentia afilado y listo para dar el salto, estaba decidido a 'coger la vida con el lazo' - a preservarla en el propio acto de vivirla. Sobre todo, ansiaba captar toda la esencia, en el cuadro de una unica fotografia, de alguna situacion que estuviera

1969-07-15 The sophistication of the photographic process has had two dramatic results—freeing the artist from the confines of journalistic reproductions and freeing the scientist from the unavoidable imprecision of the artist's prints. So released, both have prospered and produced their impressive nineteenth- and twentieth-century outputs. It is this premise that William M. Ivins, Jr., elaborates in *Prints and Visual Communication*, a history of printmaking from the crudest wood block, through engraving and lithography, to Talbot's discovery of the negative-positive photographic process and its far reaching consequences. 2004 With his *Big Nudes*, in the 1980s Helmut Newton created a quite unprecedented long-term bestseller.

Simultaneously, it provided a concentrated image of his aesthetic agenda. Powerful women were presented in all their naked truth without fig leaves or fashion frills. This series of black-and-white photos, produced between 1979 and 1981, also marked a stylistic change in Newton's work. Elaborate layouts full of luxury and decadence gave way to an unambiguously formulated and monumental statement. Here they come! Dressed only in their indispensable high

heels, Newton's amazons selfconfidently paraded on show. They rippled their muscles and marched individually as well as in formation toward the observer. Helmut Newton's classic work was published by us in 1990 for the first time. Powerful women were presented in all their naked truth without fig leaves or fashion frills. This series of black and white photos produced between 1979 and 1981 also marked a stylistic change in Newton's work.
