2010-12-23 A world away from the killing fields of France was a battle that could have changed the face of history. Over the course of 1917, German bombers threatened to engulf London in firestorms - a portent of the London Blitz and the Battle of Britain over twenty years later. They were determined to bring London to its knees. The First Blitz took place over eight nights in 1917, but it was

the second wave of attacks in the summer of 1918, following the development of the 'Elektron' incendiary bomb, that came within an ace of obliterating London. The margin between the survival of the world's greatest capital city and its total destruction came down to less than one hour. The events and decisions taken in the course of those fateful days were as important as anything that happened on the Western Front. With breathtaking insight, compelling drama and supreme narrative clarity, Neil Hanson tells the story of the air war that could have altered the course of the conflict, and with it the history of the twentieth century itself . . . 2014-01-13 Seamus Heaney's Nobel Lecture, captured here in *Crediting Poetry*, is a powerful defense of poetry as the ship and the anchor of our spirit within an ocean of violent, divisive politics and world-sorrow. Beginning with the creaturely existence of his childhood in a thatched farmstead in rural County Derry, Heaney traces his path in the wideness of language. It is a way forged by listening: to the burbles and squeaks of BBC and Radio Eireann from a wireless speaker, to the triple-rhyme in a line of Yeats', but

also to the sound of gunfire in Ulster and the keening desolation of all the wounded spots on the face of the earth. Out of all these sounds Heaney discovers the necessity of poetic order--an order where we can at last grow up to that which we stored up as we grew. It is poetry's ability to convey the forces of the marvelous and the murderous together, Heaney writes, that gives it at once a buoyancy and a holding, and persuades us of its truth to life. Heaney's lecture not only finds a way of crediting poetry without anxiety or apology, but it persuades us, eloquently and gracefully, of the rightness and thereness of our veritable human being. 2019-03-19 — Previously unpublished personal diaries reveal the day-to-day life of British aircrews during the Second World War, based on their personal diaries, which were written at the time — Revisiting a revised look at a popular out of print publication with fresh material such as new characters and chapters — Historically rich in detail with previously unpublished photographs of many of the characters involved — A welcome return of an updated version of a book first published over thirty years During the Second World War,

thousands of young men volunteered for service with the RAF. Some became fighter pilots, but a great many more were destined to be trained as bomber aircrew - pilots, navigators, wireless operators, bomb aimers, gunners and flight engineers. On completion of their training, a number of these recruits were posted to XV Squadron, a highly-regarded frontline bomber squadron, which had been formed during the First World War. Bomber Squadron: Men Who Flew with XV Squadron relates the personal stories of a small number of these men, giving an insight to their anxious moments when flying on operational sorties, staring death in the face in the form of prowling night-fighters and ground fire, and relaxing during their off-duty hours. The book also reveals the motivations, emotions and personal attitudes of these men who flew into combat on an almost nightly basis. Their stories encompass the whole six years of the war where XV Squadron flew various bomber types, including Fairey Battles, Bristol Blenheims, Vickers Wellingtons, Short Stirlings and Avro Lancasters.
