2016-07-28 With contributions from 70 experienced practitioners from around the world, this second edition of the authoritative Handbook of Forensic Archaeology and Anthropology provides a solid foundation in both the practical and ethical components of

forensic work. The book weaves together the discipline's historical development; current field methods for analyzing crime, natural disasters, and human atrocities; an array of laboratory techniques; key case studies involving legal, professional, and ethical issues; and ideas about the future of forensic work--all from a global perspective. This fully revised second edition expands the geographic representation of the first edition by including chapters from practitioners in South Africa and Colombia, and adds exciting new chapters on the International Commission on Missing Persons and on forensic work being done to identify victims of the Battle of Fromelles during World War I. 2023-01-01 El lector que aspire a acercarse un poco a la realidad del mundo en que le toca vivir, tiene en sus manos un libro de extraordinaria utilidad. (...) no es un texto portador de buenas noticias. (...) en el curso de esta inteligente y laboriosa investigación, al ir recogiendo toda la preciosa información que el libro resume, no pudo dejar de percatarse de que en el fondo está denunciando una profunda crisis de nuestra civilización. (...) Quien abre el libro, lo primero que encuentra es la afirmación de que la prisión no está en crisis, sino todo lo contrario, pues se extiende como nunca en todo el mundo; lo que se encuentra en crisis son los discursos legitimantes de la prisión, crisis que para nada afecta su existencia y extensión. La prisión crece, pero su legitimación desaparece. En otras palabras: ante todos sus innegables efectos negativos, nadie es capaz de asignarle objetivos racionales a una institución que, lejos de estar en crisis, se halla en franca expansión. Con todo acierto, Silvio se detiene en su selectividad. No hay discurso de legitimación en el marco de un Estado de derecho que

2013-07-04 In Intoxicated Identities, Tim Mitchell provides a novel and well-grounded framework for understanding subjective drinking experiences from the Aztecs to the present day in areas as diverse as Chiapas, Chihuahua, Oaxaca, Mexico City, Texas and California. Power drinking plays a crucial role in Mexican religion, politics, fine arts and ritual spousal abuse. Mexico ranks number one in deaths from cirrhosis, and Mexican Americans are twice as likely to be arrested for drunken driving as blacks or whites. With methods and concepts derived from an extraordinary range of disciplines, Mitchell explains how Mexican culture reinforces heavy drinking. He analyzes supply

(nationalistic marketing strategies) but emphasizes demand (psychocultural motivations unique to Mexico). He chronicles the joys and sorrows of a borrachera, or drinking binge, and explores this altered state of consciousness on its own terms, not from any temperance or anti-alcohol perspective. 2013-06-28 Charting the evolution of the port cities of Atlantic Spain and Portugal over four centuries, this book examines the often dynamic interaction between the large privileged ports of Lisbon, Seville and Cadiz (the Metropoles) and the smaller ports of, among others, Oporto, Corunna and Santander (the Second Tier). The book particularly focuses on the implications of state-sponsored commercial policies for the main ports of Atlantic Iberia during the monopoly period extending from 1503 to c.1778, and briefly considers the implications of the suppression of monopoly for these centres over the remainder of the nineteenth century. Patrick O'Flanagan employs a wealth of source material to provide a multi-faceted survey of the growth of these port cities, moving deftly from local concerns to regional developments and global relationships. Beyond Spain and Portugal, the book also considers the important role

played by the Atlantic archipelagoes of the Canaries, the Azores and Madeira. This formidable study is an essential addition to the library of those studying Atlantic Iberia, historical geography, and transatlantic economic relationships of this period. 2015-04-02 First comprehensive English-language book on the largest city in the Americas before the 1400s. Teotihuacan is a UNESCO world heritage site, located in highland central Mexico, about twenty-five miles from Mexico City, visited by millions of tourists every year. The book begins with Cuicuilco, a predecessor that arose around 400 BCE, then traces Teotihuacan from its founding in approximately 150 BCE to its collapse around 600 CE. It describes the city's immense pyramids and other elite structures. It also discusses the dwellings and daily lives of commoners, including men, women, and children, and the craft activities of artisans. George L. Cowgill discusses politics, economics, technology, art, religion, and possible reasons for Teotihuacan's rise and fall. Long before the Aztecs and 800

miles from Classic Maya centers, Teotihuacan was part of a broad Mesoamerican tradition but had a distinctive personality that invites comparison with other states and empires of the ancient world. The book begins with Cuicuilco a predecessor that arose around 400 BCE then traces Teotihuacan from its founding in approximately 150 BCE to its collapse around 600 CE It describes the city's immense pyramids and other elite structures

2004-01-01 This is the first book on the acquisition of Spanish that provides a state-of-the-art comprehensive overview of Spanish morphosyntactic development in monolingual and bilingual situations. Its content is organized around key grammatical themes that form the empirical base of research in generative grammar: nominal and verbal inflectional morphology, subject and object pronouns, complex structures involving movement (topicalizations, questions, relative clauses), and aspects of

verb meaning that have consequences for syntax. The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual, bilingual, child and adult early grammatical systems. While stressing their similarities with respect to linguistic representations and processes, the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition. It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages. This book is a must read for those interested in the acquisition of Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different contexts. 2019-06-19 En este libro se exponen ciertos aspectos básicos teórico-metodológicos y de aplicación del entrenamiento deportivo moderno con deportistas altamente cualificados. Éstos reflejan el carácter interdisciplinario de la actividad cognoscitiva y práctica en la esfera del gran deporte y la necesidad de una sólida preparación metodológica de estos profesionales. Este libro se presenta dividido

en tres partes. La primera parte introduce al lector en las funciones sociales del deporte moderno y en las bases metodológicas del entrenamiento deportivo. Esta parte dedica una especial atención a ciertas cuestiones discutibles sobre los criterios de la forma deportiva y las posibilidades de optimizarla. La segunda parte está dedicada a algunos problemas teórico-metodológicos y prácticos de la preparación física, técnica, táctica y psíquica. La tercera parte presenta y utiliza los datos de investigaciones científicas de destacados especialistas de la esfera de las ciencias pedagógicas, médico-biológicas y psicosociales, así como también ejemplos de los sistemas líderes de preparación deportiva en los países de la Europa del Este. tiempo m s din micos y adaptativos En nuestra opini n los rasgos caracter sticos las peculiaridades de T 1974 Hip tesis principal En el espacio num rico existe una esfera que en determinadas condiciones se

1975 In *The Fantastic*, Tzvetan Todorov seeks to examine both generic theory and a particular genre, moving back and forth between a poetics of the fantastic itself and a metapoetics or theory of theorizing, even as he suggest that one must, as a critic, move back and forth between theory and history, between idea and fact. His work on the fantastic is indeed about a historical phenomenon that we recognize, about specific works that we may read, but it is also about the use and abuse of generic theory. As an essay in fictional poetics, *The*

Fantastic is consciously structuralist in its approach to the generic subject. Todorov seeks linguistic bases for the structural features he notes in a variety of fantastic texts, including Potocki's *The Sargasso Manuscript*, Nerval's *Aurélia*, Balzac's *The Magic Skin*, the *Arabian Nights*, Cazotte's *Le Diable Amoureux*, Kafka's *The Metamorphosis*, and tales by E. T. A. Hoffman, Charles Perrault, Guy de Maupassant, Nicolai Gogol, and Edgar A. Poe. 2009-04-28 Since the mid-1980s, the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America, and beyond; and recent political developments are making its powerful, transformative ideas more relevant than ever before. *Psychology of Liberation: Theory and*

*Applications* updates the activist frameworks developed by Ignacio Martin-Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds, as social science and psychological practice are allied with struggles for peace, justice, and equality. In these chapters, liberation is presented as both an ongoing process and a core dimension of wellbeing, entailing the reconstruction of social identity and the transformation of all parties involved, both oppressed and oppressors. It also expands the social consciousness of professionals, bringing more profound meaning to practice and enhancing related areas such as peace psychology, as shown in articles such as these: Philippines: the role of liberation movements in the transition to democracy. Venezuela: liberation psychology as a therapeutic intervention with street youth. South Africa: the movement for representational knowledge. Muslim world: religion, the state, and the gendering of human rights. Ireland: linking personal and political development. Australia: addressing issues of racism, identity, and immigration. Colombia: building cultures of peace from the devastation of war. *Psychology of Liberation* demonstrates the commitment to overcome social injustices and oppression. The book is a critical resource for social and community psychologists as well as policy analysts. It can also be used as a text for graduate courses in psychology, sociology, social work and community studies.

2009-01-01 Afirmer que un autor es clásico es reconocer su contemporaneidad. Más allá de un calificativo, se trata de saber hasta dónde llega, en qué se cifra y en qué se muestra su vigencia. ¿Cuál es el legado de Émile Durkheim que nos lleva a considerarlo contemporáneo y reconocer su actualidad? Esta cuestión, como proyecto de reflexión, fue abordada por un grupo de sociólogos y antropólogos de diferentes universidades del país, acompañados de reconocidos expertos internacionales. Conscientes de que su desarrollo llevaba inexorablemente a una confrontación del pasado y el presente, se preguntaron en qué forma debía realizarse: ¿Como evaluación distante y fría, dispendiosa y probablemente inútil?, ¿Como juicio inquisitorial, poniendo al autor en manos del tribunal de la sociología actual y aprovechando las ventajas que tienen los vivos sobre los muertos?, ¿con actitud descalificadora por el hecho obvio de que los problemas de su época no son los de la nuestra, y porque en muchos de sus escritos denota una mentalidad anticuada para los hombres y mujeres de hoy?. Sin desconocer la distancia espacio-temporal y cultural que los separa del maestro, trataron, más bien de abrir un diálogo histórico con su obra que les permitiera a los sujetos participantes

sentirse vivos y tratados con equidad. En este libro se recoge la riqueza de este encuentro realizado en Bogotá, en el mes de abril del 2008, convocado por el Departamento de Sociología de la Universidad Nacional de Colombia con el fin de rendirle un homenaje a este padre fundador de la sociología académica, al cumplirse 150 años de su nacimiento. 2010-11-26 Upon its publication in 1989, this was the first systematic and comprehensive analysis of the Latin American School of Development and an invaluable guide to the major Third World contribution to development theory. The four major strands in the work of Latin American Theorists are: structuralism, internal colonialism, marginality and dependency. Exploring all four in detail, and the interconnections between them, Cristobal Kay highlights the developed world's over-reliance on, and partial knowledge of, dependency theory in its approach to development issues, and analyses the first major challenges to neo-classical and modernisation theories from the Third World. The four major strands in the work of Latin American Theorists are structuralism internal colonialism marginality and dependency

2019-10-24 La epidemia de fiebre amarilla que surgió en 2002 en los territorios del Catatumbo nortesantandereano y que se expandió en 2004 hacia la Sierra Nevada de Santa Marta generó protestas desde distintos sectores sociales y cuestionamientos a la Ley 100 de 1993 que ha regido el sector salud del país en medio de grandes controversias. Esta no fue la primera vez en la historia reciente de Colombia que se presentó una epidemia de fiebre amarilla de características similares. La última ocurrida en la misma región emergió entre 1978 y 1979, y puso en tela de juicio el modelo de salud vigente. Asimismo, otros muchos brotes y epidemias de fiebre amarilla y otras enfermedades transmitidas por vectores (ETV) se han registrado en el territorio nacional, y han dado lugar a correlatos de protesta y crítica al sistema de salud de cada momento. La investigación documentada en este libro se propuso ampliar el panorama sobre las interacciones entre política y salud pública en Colombia, analizando las relaciones existentes entre política

contendiente, tendencias en las políticas públicas y procesos de salud-enfermedad relacionados con ETV en el contexto colombiano. Este proyecto fue posible gracias al apoyo del Grupo de Investigación en Violencia y Salud de la Universidad Nacional de Colombia que se creó en 2005, y al Doctorado en Salud Pública de la misma

universidad, que se oferta desde el primer semestre de 2004 como respuesta a las necesidades en salud pública de Colombia y Latinoamérica.
