2014-07-15 Don Juan Manuel, nephew of King Alfonso X, The Wise, knew well the appeal of exempla (moralized tales), which he believed should entertain if they were to provide ways and means for solving life's problems. His fourteenth-century book, known as El Conde lucanor, is considered by many to be the purest Spanish prose before the immortal Don Quixote of Cervantes written two centuries later. He found inspiration for his tales in classical and eastern literatures, Spanish history, and folklore. His stories are not translations, but are his retelling of some of the best stories in

existence. The translation succeeds in making the author speak as clearly to the modern reader as to readers of his own time. 2010-04-01 In 1984, R. Edward Freeman published his landmark book, *Strategic Management: A Stakeholder Approach*, a work that set the agenda for what we now call stakeholder theory. In the intervening years, the literature on stakeholder theory has become vast and diverse. This book examines this body of research and assesses its relevance for our understanding of modern business. Beginning with a discussion of the origins and development of stakeholder theory, it shows how this corpus of theory has influenced a variety of different fields, including strategic management, finance, accounting, management, marketing, law, health care, public policy,

and environment. It also features in-depth discussions of two important areas that stakeholder theory has helped to shape and define: business ethics and corporate social responsibility. The book concludes by arguing that we should re-frame capitalism in the terms of stakeholder theory so that we come to see business as creating value for stakeholders. 2021-01-19 Achille Mbembe is one of the world's most profound critics of colonialism and its consequences, a major figure in the emergence of a new wave of French critical theory. His writings examine the complexities of decolonization for African subjectivities and the possibilities emerging in its wake. In *Out of the Dark Night*, he offers a rich analysis of the paradoxes of the postcolonial moment that points toward new liberatory models of community, humanity, and planetarity. In a nuanced consideration of the African experience, Mbembe makes sweeping interventions into debates about citizenship, identity, democracy, and modernity. He eruditely ranges across European and African thought to provide a powerful assessment of common ways of writing and thinking about the world. Mbembe criticizes the blinders of European

intellectuals, analyzing France's failure to heed postcolonial critiques of ongoing exclusions masked by pretenses of universalism. He develops a new reading of African modernity that further develops the notion of Afropolitanism, a novel way of being in the world that has arisen in decolonized Africa in the midst of both destruction and the birth of new societies. Out of the Dark Night reconstructs critical theory's historical and philosophical framework for understanding colonial and postcolonial events and expands our sense of the futures made possible by decolonization. 2013-11-01 During China's late imperial period (roughly 1400-1900 CE), men would gather by the millions every two or three years outside official examination compounds sprinkled across China. Only one percent of candidates would complete the academic regimen that would earn them a post in the administrative bureaucracy. Civil Examinations assesses the role of education, examination, and China's civil service in fostering the world's first professional class based on demonstrated knowledge and skill. While millions of men dreamed of the worldly advancement an imperial education promised, many more wondered what went

on inside the prestigious walled-off examination compounds. As Benjamin A. Elman reveals, what occurred was the weaving of a complex social web. Civil examinations had been instituted in China as early as the seventh century CE, but in the Ming and Qing eras they were the nexus linking the intellectual, political, and economic life of imperial China. Local elites and members of the court sought to influence how the government regulated the classical curriculum and selected civil officials. As a guarantor of educational merit, civil examinations served to tie the dynasty to the privileged gentry and literati classes--both ideologically and institutionally. China did away with its classical examination system in 1905. But this carefully balanced and constantly contested piece of social engineering, worked out over the course of centuries, was an early harbinger of the meritocratic regime of college boards and other entrance exams that undergirds higher education in much of the world today. As Benjamin A Elman reveals what occurred was the weaving of a complex social web

2016-02-02 Historian and political thinker Ellen Meiksins Wood argues that theories of "postmodern" fragmentation, "difference," and con-tingency can barely accommodate the idea of capitalism, let alone subject it to critique. In this book she sets out to renew the critical program of historical materialism by redefining its basic concepts and its theory of history in original and imaginative ways, using them to identify the specificity of capitalism as a system of social relations and political power. She goes on to explore the concept of democracy in both the ancient and modern world, examining its relation to capitalism, and raising questions about how democracy might go beyond the limits imposed on it.
