2013-12-13 The anthropologist Claude Levi-Strauss was one of the greatest intellectuals of the twentieth century. His work has had a profound impact not only within anthropology but also linguistics, sociology and philosophy. In this short book he examines the nature and role of myth in human history, distilling a lifetime of writing into a few sharp insights. It is a crystalline overview of many of the basic ideas underlying his work, including the theory of structuralism and the difference between 'primitive' and 'scientific' thought and shows why Levi-Strauss remains a hugely important intellectual figure. With a new foreword by Patrick Wilcken. In this short book he

1998-10-29 On December 12, 1794, Fray Servando Teresa de Mier preached a sermon in Mexico City that led to his arrest by the Inquisition. He was exiled to Spain--only to escape and spend ten years traveling throughout Europe, as none other than a French priest. So began the grand adventure of Fray Servando's life, and of this gripping memoir. Here is an invitation hard for any reader to resist: a glimpse of the European Age of Enlightenment through the eyes of a fugitive Mexican friar. In this memoir, one sees a portrait of manners and morals that is a far cry from the civilized spirit that the Empire wanted to impose on its Colonies. This book takes a look at history from an upside down perspective, asking this question: who were the real savages, the colonizers themselves, or the supposed savages they were struggling to convert? After ten years, Fray Servando finally returned home to an independent Mexico, where he served the new government before his death. Heretic and rebel, fugitive and visionary, character in a novel and father of his country--Fray Servando Teresa de Mier was all of these things. Translated into

English for the first time, this memoir truly captures the passionate spirit of a fantastic man. This book takes a look at history from an upside down perspective asking this question who were the real savages the colonizers themselves or the supposed savages they were struggling to convert

1999 Concerned with the trendy, technocratic, and at times sophisticated character of contemporary education at all levels, both public and private, the authors of this collection seek to reinvigorate a Thomistic approach to education appropriate to the problems of our day. With its main inspiration taken from the work of Jacques Maritain, especially his 1943 *Education at the Crossroads*, the volume presents a trenchant critique of the privacies of contemporary education, with its emphasis upon the conventional and useful. At the same time, the essays present the outlines of the proper alternative, an education which helps students draw out from themselves the desire for truths which transcend the contingencies of culture and utility. Such an education seeks to guide students to the common things available to all human beings. The essays uphold an account of man's intellectual and affective capacities which understands these capacities as naturally ordered to truth. The essays approach the task in different but complementary ways: in critiques of contemporary theories of education, in speculative accounts of knowledge and

learning, in applications of theory to specific institutional settings, and in discussions of the political contexts governing modern education. In this rich variety of ways, the essays in *The Common Things* not only point the way back to the crossroads Maritain spoke of fifty years ago; they go on to indicate something of the landscape along the road not taken by contemporary education. ABOUT THE EDITOR: Daniel McInerney is assistant professor of philosophy at the University of St. Thomas/Center for Thomistic Studies in Houston, Texas. THE CONTRIBUTORS: In addition to the editor, the contributors to the volume are: Benedict M. Ashley, O.P., Romanus Cessario, O.P., Charles Dechert, Donald DeMarco, Curtis L. Hancock, Gregory J. 2000 A series of twelve papers which were first delivered at a conference held in 1992 to mark the 150th anniversary of the

founding of the University of Notre Dame. Universities were a creation of 12th-century Europe and mark the beginning of institutionalised education. The essays examine the nature of learning itself and how learning benefited from the university system. Other papers question the purpose of medieval University learning and its value in producing clerics and lawyers. 1997-01-09 The great German mystic Meister Eckhart remains one of the most fascinating figures in Western thought. Revived interest in Eckhart's mysticism has been matched, and even surpassed, by the study of the women mystics of the late 13th century. This book argues that Eckhart's thought cannot be fully understood until it is viewed against the background of the breakthroughs made by the women mystics who preceded him.
