2012 This groundbreaking book in theoretical and empirical phraseology research looks at Europe's linguistic situation as a whole, including 74 European and 17 non-European languages. This book

answers significant questions regarding hitherto vague ideas about the phraseological similarities between European languages and their cultural foundation, ranging from intertextuality, aspects of European mental, material, and social culture, to culturally based perception of natural phenomena. This inventory, which analyzes 190 out of a total of 380 widespread idioms and includes maps, is valuable for academic teaching and further research in the fields of phraseology and figurative language, areal and contact linguistics, and European cultural studies. 2020 This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not

as well-represented in phraseological description, despite their scientific interest.
