2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole, this major contribution should be essential reading for archaeologists, anthropologists, biologists and geographers. Adopting a novel approach to the subject, the authors examine it first in terms of seven different disciplinary perspectives: social, ecological, genetic, linguistic, biomolecular, epidemiological and geogrpahical. Then, 20 case studies are presented, which are based primarily on archaeological and biological evidence and which relate to three major regions: Southwest Asia, Europe and Central Asia to the Pacific. The book concludes with an overview of Eurasia as a whole.; The transition from hunting and gathering to agriculture had revolutionary consequences for human society. It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants. The subject has been much studied, but the results have tended to be interpreted largely in terms of local cultural sequences, with insufficient comparison made with evidence from other areas. In contrast, this book provides a continental- scale framework, with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10,000 years ago.; Comprehensive and authoritative, The Origins and Spread of

Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization. 1975 In *The Fantastic*, Tzvetan Todorov seeks to examine both generic theory and a particular genre, moving back and forth between a poetics of the fantastic itself and a metapoetics or theory of theorizing, even as he suggest that one must, as a critic, move back and forth between theory and history, between idea and fact. His work on the fantastic is indeed about a historical phenomenon that we recognize, about specific works that we may read, but it is also about the use and abuse of generic theory. As an essay in fictional poetics, *The Fantastic* is consciously structuralist in its approach to the generic subject. Todorov seeks linguistic bases for the structural features he notes in a variety of fantastic texts, including Potocki's *The Sargasso Manuscript*, Nerval's *Aurélia*, Balzac's *The Magic Skin*, the *Arabian Nights*, Cazotte's *Le Diable Amoureux*, Kafka's *The*

2011-04-25 The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, *Pragmatics of Human Communication* has formed the foundation of much contemporary research into interpersonal

communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication. 2001-08-28 Cultural Materialism, published in 1979, was Marvin Harris's first full-length explication of the theory with which his work has been associated. While Harris has developed and modified some of

his ideas over the past two decades, generations of professors have looked to this volume as the essential starting point for explaining the science of culture to students. Now available again after a hiatus, this edition of Cultural Materialism contains the complete text of the original book plus a new introduction by Orna and Allen Johnson that updates his ideas and examines the impact that the book and theory have had on anthropological theorizing. 2003 AAPG Memoir 79, The Circum-Gulf of Mexico and the Caribbean, is the first volume in more than a decade to document such a wide range of research on the geology of this vast area. Of the total 44 papers, roughly two-thirds pertain to the Gulf of Mexico, with an emphasis on the Mexican portion of the basin, and to the petroliferous areas of the southern Caribbean, including Colombia, Venezuela, Cuba, and Trinidad and Tobago. The remaining papers relate to the Antilles and Central America, as well as a series of papers that address region-wide topics such as plate tectonic evolution. A significant number of papers were contributed by authors from national oil companies and universities from within the region. --AAPG. 2008-08-22 The book is dedicated to linguistic morphology and it contains a sketch of a complete morphological theory, centered around a discussion of fundamental concepts such as morph vs. morpheme, inflectional category, voice, grammatical case, agreement vs. government, suppletion, relationships between linguistic signs, etc.: the hottest issues in modern linguistics! The book introduces rigorous and clear concepts necessary to describe morphological phenomena of natural languages. Among other things, it offers logical calculi of possible grammemes in a given category. The presentation is developed in a typological perspective, so that linguistic data from a large variety of languages are

described and analyzed (about 100 typologically very different languages). The main method is deductive: the concepts proposed in Aspects of the Theory of Morphology are based on a small set of indefinibilia and each concept is defined in terms of these indefinibilia and/or other concepts defined previously; as a result, logical calculi can be constructed (similar to Mendeleev's Periodical Table of Elements in chemistry). Then the concept is applied to the actual linguistic data to demonstrate its validity and advantages. Thus, Aspects of the Theory of Morphology combines metalinguistic endeavor (a system of concepts for morphology) with typological and descriptive orientation. It reaches out to all students of language, including the border fields and applications. 2012-06-13 Tourism—one of the world's largest industries—has long been appreciated for its economic benefits, but in this volume tourism receives a unique systematic scrutiny as a medium for cultural exchange. Modern developments in technology and industry, together with masterful advertising, have created temporarily leisured people with the desire and the means to travel. They often in turn effect profound cultural change in the places

they visit, and the contributors to this work all attend to the impact these guests have on their hosts. In contrast to the dramatic economic transformations, the social repercussions of tourism are subtle and often recognized only by the indigenous peoples themselves and by the anthropologists who have studied them before and after the introduction of tourism. The case studies in *Hosts and Guests* examine the five types of tourism—historical, cultural, ethnic, environmental, and recreational—and their impact on diverse societies over a broad geographical range. 2014-04-01 A controversial psychological examination of how soldiers' willingness to kill has been encouraged and exploited to the detriment of contemporary civilian society. Psychologist and US Army Ranger

Dave Grossman writes that the vast majority of soldiers are loath to pull the trigger in battle. Unfortunately, modern armies, using Pavlovian and operant conditioning, have developed sophisticated ways of overcoming this instinctive aversion. The mental cost for members of the military, as witnessed by the increase in post-traumatic stress, is devastating. The sociological cost for the rest of us is even worse: Contemporary civilian society, particularly the media, replicates the army's conditioning techniques and, Grossman argues, is responsible for the rising rate of murder and violence, especially among the young. Drawing from interviews, personal accounts, and academic studies, *On Killing* is an important look at the techniques the military uses to overcome the powerful reluctance to kill, of how killing affects the soldier, and of the societal implications of escalating violence.
