común, y para quienes la eficiencia y la eficacia se convierten en un factor primordial para fortalecer su crecimiento y desarrollo. Así las cosas, no es ilógico que los conceptos de sostenibilidad, competitividad y proyectos estén estrechamente relacionados, por el contrario, los proyectos exitosos, correctamente gestionados, tienen un impacto positivo en las comunidades que dependen de sus resultados y por consiguiente generan valor, fortaleciendo así la competitividad de los países. 2247 Jansen J P Van Den Bosch F A J y Volberda H W 2005 Managing potential and realized absorptive capacity how do organizational antecedents matter Academy of management journal 48 6 999 1015 Kogut B y Zander

2023-04-28 El 6 de diciembre de 1996 la UNESCO declaraba a Cuenca como Ciudad Patrimonio de la Humanidad por ser un ejemplo de ciudad medieval fortificada que conserva su paisaje urbano original y que confluye a la perfección con paisaje natural que la rodea. Han pasado casi 27 años y Cuenca ha mantenido esos valores que la hicieron merecedora de ese galardón, adaptándose a los nuevos tiempos, pero conservando esa raíz histórica que la ata a las rocas sobre las que está erigida. Esa herencia recibida debemos gestionarla de manera adecuada, ya que es nuestro bien máspreciado. Por ello, era necesario reunir en una monografía a diversos expertos que analizaran desde un punto de vista interdisciplinar algunas cuestiones de los

procesos formativos de la ciudad, tanto geográficos como históricos, y constructivos. Así surge este trabajo, que bajo el título La construcción y el paisaje en las ciudades Patrimonio Mundial. Historia, gestión y procesos, nos adentra en los valores que hicieron a Cuenca merecedora de ser ciudad Patrimonio de la Humanidad y en cómo se debe gestionar este galardón en el futuro. 2247 2 Expte 40 Archivo Municipal de Cuenca 1906 Legajo 2247 2 Expte 54 Archivo Municipal de Cuenca 1909 proyecto de prolongación del ensanche que abarca la zona 3a 10 ILUSTRACIONES Fig 1 Fotografía de la calle

2023-11-24 This book gathers an important research process in the field of project management, addressing a current issue for the challenges posed by highly competitive environments, such as the

relationship of projects with knowledge, more specifically with external knowledge. For this purpose, it uses the dynamic absorptive capacity, a concept widely used in the scientific literature but little explored in project management. The book also presents a practical tool to determine the magnitude of the dynamic absorptive capacity. This makes it possible to establish a baseline to initiate a process of continuous improvement, which provides the opportunity to improve the competitiveness of the organization based on proper knowledge management. In this same sense, the model presented in this document contains a series of intervals that offer the possibility for the organization to catalog its results qualitatively.

2016-06-02 Regenerating Urban Land draws on the experience of eight case studies from around the world. The case studies outline various policy and financial instruments to attract private sector investment in urban regeneration of underutilized and unutilized areas and the requisite infrastructure improvements. In particular, each case study details the project cycle, from the scoping phase and determination of the initial amount of public sector investment, to implementation and subsequent leveraged private-sector funds. This manual analyzes rates of return on the investments and long-term financial sustainability. Regenerating Urban Land

guides local governments to systematically identify the sequence of steps and tasks needed to develop a regeneration policy framework, with the participation of the private sector. The manual also formulates specific policies and instruments for expanding private sector participation; structuring effective administrative and legal frameworks; utilizing land readjustment/assembly methods; determining duration of contracts, adequate phasing, and timeline; and balancing the distribution of risk and sustainability measures. This manual analyzes rates of return on the investments and long term financial sustainability

1991 One of the great repositories of a people's world view and religious beliefs, the Huarochirí Manuscript may bear comparison with such civilization-defining works as Gilgamesh, the Popul Vuh, and the Sagas. This translation by Frank Salomon and George L. Urioste marks the first time the Huarochirí Manuscript has been translated into English, making it available to English-speaking students of Andean culture and world mythology and religions. The Huarochirí Manuscript holds a summation of

native Andean religious tradition and an image of the superhuman and human world as imagined around A.D. 1600. The tellers were provincial Indians dwelling on the west Andean slopes near Lima, Peru, aware of the Incas but rooted in peasant, rather than imperial, culture. The manuscript is thought to have been compiled at the behest of Father Francisco de Avila, the notorious extirpator of idolatries. Yet it expresses Andean religious ideas largely from within Andean categories of thought, making it an unparalleled source for the prehispanic and early colonial myths, ritual practices, and historic self-image of the native Andeans. Prepared especially for the general reader, this edition of the Huarochirí Manuscript contains an introduction, index, and notes designed to help the novice understand the culture and history of the Huarochirí-area society. For the benefit of specialist readers, the Quechua text is also supplied. 2013-07-22 For most of the postcolonial era, the Aymara Indians of highland Bolivia were a group without representation in national politics. Believing that their cause would finally be recognized, the Aymara fought alongside the victorious liberals during the Civil War of 1899. Despite Aymara loyalty, liberals quickly moved to marginalize them after the war. In her groundbreaking study, E. Gabrielle Kuenzli revisits the events of the civil war and its aftermath to dispel popular myths about the Aymara and reveal their forgotten role in the nation-building project of modern Bolivia. Kuenzli examines documents from the famous postwar Pe-as Trial to recover Aymara testimony during what essentially became a witch hunt. She reveals that the Aymara served as both dutiful plaintiffs allied with liberals and unwitting defendants charged with wartime atrocities and instigating a race war. To further combat their Indian problem, Creole liberals developed a public discourse that positioned the Inca as the only Indians worthy of national inclusion. This was justified by the Incas' high civilization and reputation as noble conquerors, along with their current non-threatening nature. The

whitening of Incans was a thinly veiled attempt to block the Aymara from politics, while also consolidating the power of the Liberal Party. Kuenzli posits that despite their repression, the Aymara did not stagnate as an idle, apolitical body after the civil war. She demonstrates how the Aymara appropriated the liberal's Indian discourse by creating theatrical productions that glorified Incan elements of the Aymara past. In this way, the Aymara were able to carve an acceptable space as progressive Indians in society. Kuenzli provides an extensive case study of an Inca play created in the Aymara town of Caracollo, which proved highly popular and helped to unify the Aymara. As her study shows, the Amyara engaged liberal Creoles in a variety of ways at the start of the twentieth century, shaping national discourse and identity in a tradition of activism that continues to this day. In her groundbreaking study E Gabrielle Kuenzli revisits the events of the civil war and its aftermath to dispel popular myths about the Aymara and reveal their forgotten role in the nation building project of modern Bolivia
