2009-11-10 #1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that

execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a "vision" and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan. Leading these processes is the real job of running a business not formulating a vision and leaving the work of carrying it out to others

2016-11-29 En las últimas décadas, nuestro país ha enfrentado la problemática de la generación de nuevos empleos que

fortalezcan su economía, y aunque el gobierno invierte bastantes recursos, implementando diferentes estrategias para encontrar una solución favorable, en muchos casos no se ha obtenido el resultado esperado. Una vía segura y eficiente para lo anterior, son las incubadoras de negocios dentro de las universidades, ya que ofrecen al emprendedor y al empresario diversos servicios como: alojamiento, asesoría para la elaboración de un plan de negocios y la obtención de financiamiento de los fondos del Gobierno Federal; consultoría especializada en diferentes áreas (legal, administrativa, mercadotecnia, contable, fiscal y tecnológica), así como el acompañamiento hasta su consolidación. Cada proyecto incubado genera, por lo menos, cuatro nuevos empleos; por ello, es importante impulsar este programa brindando a los emprendedores, empresarios y consultores una guía que les sirva de apoyo y les facilite el proceso. Esta obra está diseñada para servir como libro de texto y de consulta específica, porque en ella encontramos todo el proceso que se debe realizar dentro de una incubadora de negocios, hasta llegar a la obtención de los financiamientos que ofrece el Gobierno Federal. 310 1956 341 21516 375 33668 999 1096 844 1195 5284 13150812 1446 5994 2 260 2486 165 2734 7815 3008 2597 3309 0856 2 212 2433 618 26769798 2 944 6778 3239 1456 1053 581 Acc Act Aci Aci Ac Pol Pol Aca Ser ibond ul medio

2005 The 2006 edition of UNICEF's annual report focuses on the millions of children who are most in need of access to essential education, health and protection services, but who are also the hardest to reach and often overlooked by current development programmes. These include children living in the poorest countries and most deprived communities within countries, children who face discrimination on the basis of gender, ethnicity or disability, children caught up in armed conflicts or affected by HIV/AIDS, children who lack a formal identity and who suffer from abuse and exploitation. The report examines the factors which result in their exclusion from current child development programmes and services, and highlights the policy options and actions required to address these challenges, in order to ensure all children benefit from the progress being made to achieve the Millennium Development Goals. Topics discussed include: income disparities and

child survival, the marginalisation of Roma communities and their children, disability issues, children and HIV/AIDS, children living on the streets, early marriages, child labour, child protection and child rights. 2002-11-23 Most histories of the Spanish Civil War (1936-1939) have examined major leaders or well-established political and social groups to explore class, gender, and ideological struggles. The war in Spain was marked by momentous conflicts between democracy and dictatorship, Communism and fascism, anarchism and authoritarianism, and Catholicism and anticlericalism that still provoke our fascination. In *Republic of Egos*, Michael Seidman focuses instead on the personal and individual experiences of the common men and women who were actors in a struggle that defined a generation and helped to shape our world. By examining the roles of anonymous individuals, families, and small groups who fought for their own interests

and survival—and not necessarily for an abstract or revolutionary cause—Seidman reveals a powerful but rarely considered pressure on the outcome of history. He shows how price controls and inflation in the Republican zone encouraged peasant hoarding, black marketing, and unrest among urban workers. Soldiers of the Republican Army responded to material shortages by looting, deserting, and fraternizing with the enemy. Seidman's focus on average, seemingly nonpolitical individuals provides a new vision of both the experience and outcome of the war. In *Republic of Egos* Michael Seidman focuses instead on the personal and individual experiences of the common men and women who were actors in a struggle that defined a generation and helped to shape our world
