Theoretical views of humor range from the physiological to the sociological and anthropological. The relations between humor, laughter, and smiling are considered, along with the connection between collative variables and arousal. Comprised of 13 chapters, this book begins with an introduction to the history of thought and major theoretical issues on humor, followed by a description of models of different aspects of humor. The next section deals with empirical issues in which selected research areas are given detailed attention. The relations between humor, laughter, and smiling, on the one hand, and collative variables and arousal, on the other, are analyzed. Subsequent chapters explore the cognitive origins of incongruity humor by comparing fantasy assimilation and reality assimilation; a two-stage model for the appreciation of jokes and cartoons; and the social functions and physiological correlates of humor. The relationship between arousal potential and funniness of jokes is also explored, together with humor judgments as

a function of reference groups and identification classes. 1993 By comparing Spanish artist Joan Miro's finished paintings and sculptures with more than 1200 of his sketches and preparatory studies, Gimferrer places Miro's art in a surprising new perspective. Marvelously illustrated with 285 radiant color plates and 1276 in black-and-white, this intensive analysis of Miro's creative process explains how he would first isolate some element from the teeming outside world, then incorporate a graphic sign into it, thus setting in motion a transfigurative process in which objects, signs and symbols underwent a constant metamorphosis. In placing Miro's preliminary drawings alongside the pictures to which they gave rise, Spanish poet and art critic Gimferrer illuminates the inner alchemy by which Miro discovered his major motifs and set them loose in a free-floating pictorial universe.
