2000 This book outlines the principles of eco-efficiency and presents case studies of their application from a number of international companies, including 3M and the Dow Chemical Company. The term eco-efficiency describes business activities that create economic value while reducing ecological impact and resource use. This book outlines the principles of eco-efficiency and presents case studies of their application from a number of international companies, including 3M and the Dow Chemical Company. It also discusses the value of partnerships--with other companies, business associations, communities, regulators, and environmental and other nongovernmental

groups. In the conclusion, the authors argue that business must become more eco-efficient and that governments need to change the conditions under which business operates, including tax and regulatory regimes, to make them more conducive to eco-efficiency. 2003-01-09 Design Methods for Reactive Systems describes methods and techniques for the design of software systems—particularly reactive software systems that engage in stimulus-response behavior. Such systems, which include

information systems, workflow management systems, systems for e-commerce, production control systems, and embedded software, increasingly embody design aspects previously considered alone—such as complex information processing, non-trivial behavior, and communication between different components—aspects traditionally treated separately by classic software design methodologies. But, as this book illustrates, the software designer is better served by the ability to intelligently pick and choose from among a variety of techniques according to the particular demands and properties of the system under development. Design Methods for Reactive Systems helps the software designer meet today's increasingly complex challenges by bringing together specification techniques and guidelines proven useful in the design of a wide range of software systems, allowing the designer to evaluate and adapt different techniques for different projects. Written in an exceptionally clear and insightful style, Design Methods for Reactive Systems is a book that students, engineers, teachers, and researchers will undoubtedly find of great value. - Shows how the techniques and design approaches of the three most popular design methods can be combined in a flexible, problem-driven manner. - Pedagogical features include summaries, rehearsal questions, exercises, discussion questions, and numerous case studies. But as this book illustrates the software designer is better served by the ability to intelligently pick and choose from

2021-07-22 El futuro de esta tercera

década del siglo XXI y las siguientes se presenta con notable claridad en cuanto al avance imparable de las Finanzas sostenibles, con una vuelta a los orígenes éticos de la Economía y las Finanzas, así como también las Finanzas del comportamiento trufadas de Psicología, Sociología e Historia. También, por la necesidad de complementos interdisciplinarios entre Economía, Derecho y Finanzas de Empresa así como al mismo tiempo, en principio paradójicamente, la necesidad de una mayor especialización en estas disciplinas, tanto académica como profesionalmente, dada su autonomía en cuanto a objeto, objetivos, metodología e historia. El lector tiene en sus manos un excelente compendio de lo más actual, de vanguardia y futuro relacionado con "Economía, Empresa y Justicia. Nuevos retos para el futuro" que, como mínimo, le obligará a algo que en amplios sectores de la sociedad se está perdiendo, que es reflexionar y pensar pausadamente con fundamento. recurso humano son las mayores puntuadas con un rango de 4 50 a 4 42 Tabla 2 An lisis descriptivo por componente de gesti n Factor Interno de Gesti n G gesti n de tecnolog a e innovaci n obtiene el menor promedio 2521

2014-06-11 Alexander Luria was one of the most influential psychologists of the 20th century. His official autobiography was written as a citizen of the Soviet Union, and while it provides a compelling story of his

lifelong devotion to developing a comprehensive theory of the biological and cultural foundations of human nature, it is conspicuous for the absence of information about the social context of his work and his personal struggles to be a decent person in indecent times. The current dialogic autobiography brings the vitality of Luria's ideas back to life. Michael Cole and Karl Levitin, both of whom knew Luria well and have written about his life and work, have written a carefully researched introduction and epilogue to the original autobiography. They provide readers, for the first time, with information about the social and personal contexts of Luria's remarkable achievements. Their account is supplemented by downloadable resources with reminiscences of leading psychologists from around the world who knew and worked with Luria. At last, Luria's life and science are brought together in a single volume. The book will appeal to psychologists, neuropsychologists, and other scientists interested in Luria's life achievements. 2005 The 2006 edition of UNICEF's annual report focuses on the millions of children who are most in need of access to essential education, health and protection services, but who are also the hardest to reach and often overlooked by current development programmes. These include children living in the poorest countries and most deprived communities within countries, children who face discrimination on the basis of gender, ethnicity or disability, children caught up in armed conflicts or affected by

HIV/AIDS, children who lack a formal identity and who suffer from abuse and exploitation. The report examines the factors which result in their exclusion from current child development programmes and services, and highlights the policy options and actions required to address these challenges, in order to ensure all children benefit from the progress being made to achieve the Millennium Development Goals. Topics discussed include: income disparities and child survival, the marginalisation of Roma communities and their children, disability issues, children and HIV/AIDS, children living on the streets, early marriages, child labour, child protection and child rights.
