2005 What made Chekhov tick? What served as a source of creative inspiration in his life? In answering these questions, Russian scholar Rosamund Bartlett focuses on the writer's intimate relationship with the places where he lived and traveled--Taganrog and the southern Russian steppes, Moscow, Petersburg, Siberia, the French Riviera, and Yalta. By looking at his life through the prism of these landscapes, it is possible to gain a far greater insight into one of the most enigmatic writers who ever lived. Chekhov: Scenes from a Life restores the humor and warmth to a man too often seen as merely melancholic, and reminds us why many consider him to be the greatest short-story writer of all time. 2008-12-16 The world's oceans cover 70% of the earth's surface and are home to a myriad of amazing and beautiful creatures. However, the biodiversity of the oceans is increasingly coming under serious threat from many human activities including overfishing, use of destructive fishing methods, pollution and commercial aquaculture. In addition, climate change is already having an impact

on some marine ecosystems. This book discusses some of the major threats facing marine ecosystems by considering a range of topics, under chapters discussing biodiversity (Chapter 1), fisheries (Chapter 2), aquaculture (Chapter 3), pollution (Chapter 4) and the impacts of increasing greenhouse gas emissions (Chapter 5). It goes on to explore solutions to the problems by discussing equitable and sustainable management of the oceans (Chapter 6) and protecting marine ecosystems using marine reserves (Chapter 7). Presently, 76% of the oceans are fully or over-exploited with respect to fishing, and many species have been severely depleted. It is abundantly clear that, in general, current fisheries management regimes are to blame for much of the widespread degradation of the oceans. Many policy-makers and scientists now agree that we must adopt a radical new approach to managing the seas - one that is precautionary in nature and has protection of the whole marine ecosystem as its primary objective. This 'ecosystem-based approach' is vital if we are to ensure the health of our oceans for future generations. This book discusses some of the major threats facing marine ecosystems by considering a range of topics under chapters discussing biodiversity Chapter 1 fisheries Chapter 2 aquaculture Chapter 3 pollution Chapter 4 and the

2014-04-07 All museum activities converge in the public forum of the exhibition - regardless of whether the exhibit is held in the physical museum or is on the Web. Since the first edition of this book in 2002, there has been a world-wide explosion of new galleries and exhibition halls, and new ideas about how exhibitions should look and communicate. The definition of what an exhibition is has changed as exhibitions can now be virtual; non-traditional migratory and pop-up spaces play host to temporary

displays; social media has created amazing opportunities for participatory engagement and shifted authority away from experts to the public; and as time-constrained audiences demand more dynamic, interactive, and mobile applications, museum leadership, managers, staff, and designers are rising to these challenges in innovative ways. Drawing on years of experience and top-flight expertise, Barry Lord and Maria Piacente detail the exhibition process in a straightforward way that can be easily adapted by institutions of any size. They explore the exhibition development process in greater detail, providing the technical and practical methodologies museum professionals need today. They've added new features and expanded chapters on project management, financial planning and interactive multimedia while retaining the essential content related to interpretive planning, curatorship, and roles and responsibilities. This second edition of the standby *Manual of Museum Exhibitions* is arranged in four parts: **Why** - Covering the purpose of exhibits, where exhibit ideas come from, and how to measure success **Where** - Covering facilities and spaces, going into details including security, and interactive spaces **What** - A look at both permanent collection displays, and non-collection displays, as well as virtual, participatory, temporary, travelling displays, and retail sales **How** - Who is involved, planning, curatorship, and content development, design, multimedia, fabrication

and installation, financial planning, and project management Over 130 figures and photographs illustrate every step of the exhibit process. No museum can be without this critical, detailed guide to an essential function. This second edition of the standby Manual of Museum Exhibitions is arranged in four parts Why Covering the purpose of exhibits where exhibit ideas come from and how to measure success Where Covering facilities and spaces going
