2020-04-11 It is important not to confuse freedom with mere permissiveness. Theodore John Kaczynski (1942-) or also known as the Unabomber, is an American domestic terrorist and anarchist who moved to a remote cabin in 1971. The cabin lacked electricity or running water, there he lived as a recluse while learning how to be self-sufficient. He began his bombing campaign in 1978 after witnessing the destruction of the wilderness surrounding his cabin. 2003-11-25 On 8 March 1421, the largest fleet the world had ever seen set sail from China. The ships, some nearly five hundred feet long, were under the command of Emperor Zhu Di's loyal eunuch admirals. Their mission was 'to proceed all the way to the end of the earth to collect tribute from the barbarians beyond the seas' and unite the world in Confucian harmony. Their journey would last for over two years and take them around the globe but by the time they returned home, China was beginning its long, self-imposed isolation from the world it had so recently embraced. And so the great ships were left to rot and the records of their journey were destroyed. And with them, the knowledge that the Chinese had circumnavigated the globe a century before Magellan, reached America seventy years before Columbus, and Australia three hundred and fifty years before Cook... The result of fifteen years research, 1421 is Gavin Menzies' enthralling account of the voyage of the Chinese fleet, the remarkable discoveries he made and the persuasive evidence to support them: ancient maps, precise navigational knowledge, astronomy and the surviving accounts of Chinese

explorers and the later European navigators as well as the traces the fleet left behind - from sunken junks to the votive offerings left by the Chinese sailors wherever they landed, giving thanks to Shao Lin, goddess of the sea. Already hailed as a classic, this is the story of an extraordinary journey of discovery that not only radically alters our understanding of world exploration but also rewrites history itself. 2019-10-08 Originally published in 1986, designed for teachers and those concerned with the education of primary and secondary school pupils, Learning Strategies presented a new approach to 'learning to learn'. Its aim was to encourage teachers to start thinking about different approaches to harnessing the potential of young learners. It was also relevant to adult learners, and to those who teach them. Thus, although about learning, the book is also very much about teaching. Learning Strategies presents a critical view of the study skills courses offered in schools at the time, and assesses in non-technical language what contributions could be made to the learning debate by recent developments in cognitive psychology. The traditional curriculum concentrated on 'information' and developing skills in reading,

writing, mathematics and specialist subjects, while the more general strategies of how to learn, to solve problems, and to select appropriate methods of working, were too often neglected. Learning to learn involves strategies like planning ahead, monitoring one's performance, checking and self-testing. Strategies like these are taught in schools, but children do not learn to apply them beyond specific applications in narrowly defined tasks. The book examines the broader notion of learning strategies, and the means by which we can control and regulate our use of skills in learning. It also shows how these ideas can be translated into classroom practice. The final chapter reviews the place of learning strategies in the curriculum. Strategies like these are taught in schools but children do not learn to apply them beyond specific applications in narrowly defined tasks

2016-07-19 This monograph provides a comprehensive research review of intelligent techniques for personalisation of e-learning systems. Special emphasis is given to intelligent tutoring systems as a particular

class of e-learning systems, which support and improve the learning and teaching of domain-specific knowledge. A new approach to perform effective personalization based on Semantic web technologies achieved in a tutoring system is presented. This approach incorporates a recommender system based on collaborative tagging techniques that adapts to the interests and level of students' knowledge. These innovations are important contributions of this monograph. Theoretical models and techniques are illustrated on a real personalised tutoring system for teaching Java programming language. The monograph is directed to, students and researchers interested in the e-learning and personalization techniques. 2012-12-04 The revered Brazilian songwriter and novelist “has breathed the story of a whole country into a single, unforgettable man with a soul as big as Brazil” (Nicole Krauss, author of *Forest Dark*). As Eulálio d’Assumpção lies dying in a Brazilian public hospital, his daughter and the attending nurses are treated—whether they like it or not—to his last, rambling monologue. Ribald, hectoring, and occasionally delusional, Eulálio reflects on his past, present, and future—on his privileged, plantation-owning family; his father’s philandering with beautiful French whores; his own half-hearted career as a weapons dealer; the eventual decline of the family fortune; and his passionate courtship of the wife who would later abandon him. Through Eulálio’s journey across the twists and turns of his own fragmented memories, Buarque conjures an evocative portrait of a man’s life and love, while bringing to life the broad sweep of Brazilian history. At once jubilant and painfully nostalgic, playful and devastatingly urgent, readers of the award-winning *Spilt Milk* will find themselves “in the hands of a master storyteller” (The Plain Dealer). “In *Spilt Milk* [Buarque] confronts

the themes that make Brazil squirm, from the stain of slavery to the inferiority complex the country has historically felt when it compares itself to Europe.” —The New York Times “Lovely details and a fine sense of place . . . Echoing Sebald’s *Rings of Saturn* . . . There’s plenty to like.” —Publishers Weekly “One of the saddest love stories, and one of the truest.” —Nicole Krauss The revered Brazilian songwriter and novelist has breathed the story of a whole country into a single unforgettable man with a soul as big as Brazil Nicole Krauss author of *Forest Dark*

2014-12-31 The 2014 edition of *Social Panorama of Latin America* presents ECLAC measurements for the analysis of income poverty, taking, as well, a multidimensional approach to poverty. Applying these two approaches to data for the countries of the region provides confirmation that despite the progress made over the past decade, structural poverty is still a feature of Latin American society. In order to contribute to a more comprehensive design of public policies aimed at overcoming poverty and socioeconomic inequality, this edition examines recent trends in social spending and sets out a deeper gap analysis focused on three areas: youth and development, gender inequality in the labour market and urban residential segregation.
