1995-09-15 An Intellectual History of Psychology, already a classic in its field, is now available in a concise new third edition. It presents psychological ideas as part of a greater web of thinking throughout history about the essentials of human nature, interwoven with ideas from philosophy, science, religion, art, literature, and politics. Daniel N. Robinson demonstrates that from the dawn of rigorous and self-critical inquiry in ancient Greece, reflections about human nature have been inextricably linked to the cultures from which they arose, and each definable historical age has added its own character and tone to this long tradition. An Intellectual History of Psychology not only explores the most significant ideas about human nature from ancient to modern times, but also examines the broader social and scientific contexts in which these concepts were articulated and defended. Robinson treats each epoch, whether ancient Greece or Renaissance Florence or Enlightenment France, in its own terms, revealing the problems that dominated the age and engaged the energies of leading thinkers. Robinson also explores the abiding tension between humanistic and scientific perspectives, assessing the most convincing positions on each side of the debate. Invaluable as a text for students and as a stimulating and insightful overview for scholars and practicing psychologists, this volume can be read either as a history of

psychology in both its philosophical and aspiring scientific periods or as a concise history of Western philosophy's concepts of human nature. 1931 Authorized translation from the German. Contains 100 maps. Includes various battles which the author analyzes along with military theories. Convinced that Germany, surrounded by powerful enemies, would have to fight outnumbered and win, Schlieffen believed the key to victory could be discovered in an account of the Battle of Cannae, written by the German military historian Hans Delbruck. Therefore, Schlieffen ordered the historical section of the General Staff to produce a set of Cannae

Studies that would demonstrate that the principle of double envelopment practiced by Hannibal at Cannae was the master key to victory in battle.

1993-01-01 Graciela Limón's absorbing first novel, *In Search of Bernabé*, humanizes the political turmoil of contemporary Central America by focusing on one woman's anguish when she is separated from her son in the chaos that follows the assassination of Archbishop Romero in El Salvador. Against incredible odds, Luz Delcano is determined to find her son, Bernabé. Her unshakeable conviction that her son has fled to the north as so many other Salvadorans were doing leads her on an odyssey through Mexico and into the United States. Meanwhile, Bernabé finds himself almost unwillingly pulled into the life of a guerrilla fighter in the mountains. Repulsed by the violent life of the guerrillas, he is unable to return to the seminary where he was to be ordained as a priest for fear of being murdered. Intertwined with the story of the Salvadorans is the story of Father Hugh, an American priest struggling with his conscience as he watches the horrors committed in El Salvador with weapons he sold to the Salvadoran military. 1987 The presence of women psychologists has largely been blotted out of historical accounts of the discipline. *Untold Lives* explores why this has occurred and champions the cause of writing women into history by reconstructing the lives of twenty-five pioneering women psychologists in America. Providing a detailed examination of several gender-specific issues, the authors describe several ways in which the experiences of this group of women differed from those of their male counterparts. Each of five early chapters tells the story of one woman whose life or career vividly exemplifies a particular theme: institutional barriers to graduate education, obligations of a daughter to her family, the marriage versus career dilemma, limited employment opportunities, and discrimination by male colleagues. The book concludes with a collective portrait of this first generation and cameos that highlight their unique experiences. -- From publisher's description. 2010-07-26 From one of the most renowned twentieth-century American

writers, this “luminous epiphany of life ... [is] a charming fable of old age, nostalgia, and loss” (The Washington Post Book World). Pulitzer Prize-winning author John Cheever's final novel is a fable set in a village so idyllic it has no fast-food outlet and having as its protagonist an old man, Lemuel Sears, who still has it in him to fall wildly in love with strangers of both sexes. But Sears's paradise is threatened; the pond he loves is being fouled by unscrupulous polluters. In Cheever's accomplished hands the battle between an elderly romantic and the monstrous aspects of late-twentieth-century civilization becomes something ribald, poignant, and ineffably joyful. This is perfect Cheever—it is perfect. —The New York Times Book Review This is perfect Cheever it is perfect The New York Times Book Review

2013-12-15 The aim of this book is to engender Mexican folk art and locate women at its centre by studying the processes of creation, distribution, and consumption, as well as examining iconographic aspects, and elements of class and ethnicity, from the perspective of gender. The author will demonstrate that the topic provides unique insights into Mexican culture, and has

enormous relevance within and without the country, given the fact that much folk art is made for the United States and Europe, either in terms of the tourists who buy it on coming to Mexico, or that which is exported.
