1964 Rival auto manufacturers boast of the low fuel-consumption records racked up by their machines. In its aim, Jean Guilton's work corresponds to that of the auto manufacturers: he, too, is concerned with economy, but in his case it is that intellectual economy achievable through streamlined methods of thinking, reading, and writing. At one time or other, all people engaged in intellectual pursuits are confronted by the proper way to do a thing. Students especially, who have not yet learned their own capacities, are easily baffled and frustrated when a teacher asks them to re-do a paper, for example. How is the question. And even seasoned thinkers often discover that the process of working which they have evolved from trial and error does not meet every new need. It is this gap in understanding how to think, how to study, how to write, etc., that the present work strives to fill. M. Guilton writes in a refreshing, informal style that cloaks (but does not hide) the insights with which a lifetime of teaching, acute powers of observation, and a profound sympathy for the problems of students have armed him.-- Back cover It is this gap in understanding how to think how to study how to write etc that the present work strives to fill

2006-01-10 From the world's leading non-nonsense revolutionary, a bold and effective analysis of American military, economic, and political vulnerability (Naomi Klein) The empire seems unassailable, but the empire is weak--and precisely because of its quest for global domination. So argues Walden Bello in this provocative portrait of imperial self-destruction, which systematically dissects the dilemmas confronting America as a result of its drive for supremacy. Puncturing the myth of American invincibility, Bello exposes its carefully concealed contradictions: despite the enormity of the U.S. military apparatus, American forces are critically overextended and ever threatened by the simmering resistance each new victory breeds. Though America is still the land of unprecedented prosperity, economic breakdown looms, the consequence of gargantuan military costs, exploitative trade and investment relations with developing countries, and record-breaking deficits. A clear and prophetic examination, Dilemmas

of Domination reveals a not-too-distant future in which the empire's hidden weaknesses will yield fatal challenges to American omnipotence. With unsentimental clarity, Walden Bello speaks the truth about American empire and why it is doomed by its own contradictions. --William Greider, author of *The Soul of Capitalism* So argues Walden Bello in this provocative portrait of imperial self destruction which systematically dissects the dilemmas confronting America as a result of its drive for supremacy

renowned author of *All Quiet on the Western Front*. With the world slowly sliding into war, it is crucial that enemies of the Reich flee Europe at once. But so many routes are closed, and so much money is needed. Then one night in Lisbon, as a poor young refugee gazes hungrily at a boat bound for America, a stranger approaches him with two tickets and a story to tell. It is a harrowing tale of bravery and butchery, daring and death, in which the price of love is beyond measure and the legacy of evil is infinite. As the refugee listens spellbound to the desperate teller, in a matter of hours the two form a unique and unshakable bond—one that will last all their lives. “The world has a great writer in Erich Maria Remarque. 2015-05-07 When published in 2009, *The Art of Flying* was hailed as a landmark in the history of the graphic novel in Spain for its deeply touching synthesis of individual and collective memories. A deeply personal testament, Altarriba's account of what led his father to commit suicide at the age of ninety is a detective novel of sorts, one that traces his father's life from an impoverished

childhood in Aragon, to service with Franco's army in the Civil war, escape to join the anarchist FAI, exile in France when the Republicans are defeated, to return to Spain in 1949 and the stultifying existence to which Republican sympathisers were consigned under Francoism. The Art of Flying is immensely moving and vivid, beautifully drawn by Kim. It was highly praised in Spain on first publication, where it was compared to Art Spiegelman's Maus. It went on to win six major prizes, including the 2010 National Comic Prize. 2019-06-27 The notion of 'the human' is in need of urgent redefinition. At a time of radical bio-technological developments, and in light of the political and environmental imperatives of our age, the term 'posthuman' provides an alternative. The philosophical landscape which has developed as a response to the crisis of the human, includes several movements, such as: Posthumanism, Transhumanism, Antihumanism and Object Oriented Ontology. This book explains the similarities and differences between these currents and offers a detailed examination of a number of topics that fall under the "posthuman" umbrella, including the anthropocene, artificial intelligence and the deconstruction of the human. Francesca Ferrando affords particular focus to Philosophical Posthumanism, defined as a philosophy of mediation which addresses the meaning of humanity not in separation, but in relation to technology and ecology. The posthuman shift thus emerges in the global call for social change, responsible science and multispecies coexistence. This book explains the similarities and differences between these currents and offers a detailed examination of a number of topics that fall

2015-02-10 New York Times Readers' Pick: Top 100 Books of the 21st Century New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have

governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.
