2017-09-19 Assessment and Evaluation for Transformation in Early Childhood establishes a new, democratic and participatory approach to assessment and evaluation in early childhood. By analysing the practice of assessment and evaluation within early childhood pedagogy, it provides a clear theoretical and methodological basis for this approach and a set of practical techniques for assessment and evaluation. Structured into three parts - context and

principles, approaches and techniques and case studies, the authors show how documentation and portfolios can be an ethical mode of conducting assessment and evaluation. The third part of the text provides educational snapshots of countries that use a participatory approach to learning and teaching, and which include the pedagogical dimension of assessment and evaluation. Each of the seven illustrative case studies from three different countries bring to life the theories, principles and techniques presented throughout the book. Key points explored include:

- The nature and purpose of assessment and evaluation within a participatory pedagogy.
- Participatory methods for assessment and evaluation.
- The search for a holistic approach to evaluation
- Pedagogic documentation: uncovering solidary learning.
- Ethical principles for holistic pedagogic evaluation

This book is a crucial read for anyone working in early childhood education who wishes to learn more about professional, practice and policy development and all those interested in the pedagogical dimensions of assessment and evaluation. Key points explored include

2004-01-22 This clear and concise new introduction examines all the major debates and issues using a wide range of well-known

examples. It discusses the challenge of using verbal and written language to analyse a visual form. Dana Arnold also examines the many different ways of writing about art, and the changing boundaries of the subject of art history. Topics covered include the canon of Art History, the role of the gallery, 'blockbuster' exhibitions, the emergence of social histories of art (Feminist Art History or Queer Art History, for example), the impact of photography, and the development of Art History using artefacts such as the altarpiece, the portrait, or pornography, to explore social and cultural issues such as consumption, taste, religion, and politics. Importantly, this book explains how the traditional emphasis on periods and styles originates in western art production and can obscure other critical approaches, as well as art from non western cultures. 2013-11-27 Solar sailing - using the sun as a propellant - offers the possibility of low-cost long-distance missions that are impossible with conventional spacecraft. This first comprehensive book on this propulsion method provides a detailed account of solar sailing, at a high technical level, but in a way accessible to the scientifically informed layperson. Solar sail orbital dynamics and solar radiation pressure form the foundations of the book, but the engineering design of solar sails is also considered, along with potential mission applications. 2011-03-10 Wood is one of the most intriguing structural materials and the only one that is truly renewable. Along with stone, wood is the oldest structural material on the planet and has been extensively used throughout human history. Due to its aesthetical value and positive environmental impact, wood has experienced a renaissance in construction. As a biodegradable, hygroscopic, non-isotropic material, wood presents special challenges for a professional and requires through knowledge ranging from biology to continuum mechanics. This state-of-the-art report reflects the current knowledge in the area of in situ assessment of the physical and mechanical properties of wood structures. Nondestructive, semi-destructive and destructive methods are described in a systematic manner where technology, equipment and limitations are discussed. Some of the discussed methods are used in other materials such as masonry and concrete. Most of the methods, however, are specific to wood and special

qualifications are required to understand and apply these methods effectively. Existing methods are constantly improved and new methods are being developed. This report includes methods that are used in practice or have shown significant promise and have a body of knowledge that supports statements made in this report.
