According to Chopra, the brain is hardwired to know God. The human nervous system has seven biological responses that correspond to seven levels of divine

experience. These are shaped not by any one religion, but by the brain's need to take an infinite, chaotic universe and find meaning in it. As we make sense of the swirling quantum soup, we inevitably find the face of God. In this remarkable book Chopra shows us how. How to Know God is Chopra's writing at its very best, an internationally celebrated blend of philosophy and science applied to the greatest subject of all. This is what each of us quests for, whether we realize it or not. For, as Chopra writes, God is our highest instinct to know ourselves.
