Both books explain how to begin and expand each program, how to make and organize necessary materials, and how to more fully develop your child's reading and math potential. *How to Give Your Baby Encyclopedic Knowledge* shows how simple it is to develop a program that cultivates a young child's awareness and understanding of the arts, science, and nature—to recognize the insects in the garden, to learn about the countries of the world, to discover the beauty of a Van Gogh painting, and much more. *How To Multiply Your Baby's Intelligence* provides a comprehensive program for teaching your young child how to read, to understand mathematics, and to literally multiply his or her overall learning potential in preparation for a lifetime of success. The *Gentle Revolution Series: The Institutes for the Achievement of Human Potential* has been successfully serving children and teaching parents for five decades. 2015-11-10 Writer, physician, philosopher and lexicographer, Émile Littré was commissioned by Hachette in 1841 to compile a new dictionary of the French language. The work, finally started in 1845, took nearly 30 years to complete, during which period France went through a great deal of turbulence. Littré wrote this companion volume, a remarkable novella-length essay, *Comment j'ai fait mon dictionnaire* ('How I Made My Dictionary'), in 1880, which was translated and published for the first time in English in 1998 by a former Indian diplomat. The translation, now brought back into print by Hachette India, has been commended by *Dictionaries*, a journal of the Dictionary Society of North America, for being 'accurate and conveying the original's lively, intense effect.
