These are stories of hope and redemption, connection and detachment, and lessons taught and learned. search for the man his father was and the life he led as a well-known footballer, blending the personal and the historical into an unforgettable story Stewart Imlach was an ordinary neighbourhood soccer star of his time. A brilliant winger who thrilled the crowd on Saturdays, then worked alongside them in the off-season; who represented Scotland in the 1958 World Cup and never received a cap for his efforts; who was Man of the Match for Nottingham Forest in the 1959 FA Cup Final, and was rewarded with the standard offer - £20 a week, take it or leave it. Gary Imlach grew up a privileged insider at Goodison Park when Stewart moved into coaching. He knew the highlights of his father's career by heart. But when his dad died he realised they were all he knew. He began to realise, too, that he'd lost the passion for football that his father had passed down to him. In this book he faces his growing alienation from the game he was born into, as he revisits key periods in his father's career to build up a picture of his football life - and through him a whole era. Habitat and biodiversity erosion. These are only a few of our most urgent ecological crises. There are others as well and, despite the popularity of good-news environmentalism, few of them are going away. In this wide-ranging, grimly entertaining commentary on the environmental debate, Tom Athanasiou finds that these problems are exacerbated, if not caused, by the planet's division into warring camps of rich and poor. Writing with passionate intelligence, Athanasiou proposes a simple yet radical solution--stop indulging easy, calming fantasies in which everything seems to change, but nothing important changes at all. Instead, do what needs to be done, now, while there is still time and goodwill. The bottom line, he concludes, is that there will be no sustainability without a large measure of justice. Without profound political and economic change, he argues, there can be no effective global environmental action, no real effort to save the planet. 1997-01-01 The environment within which humans interact has changed dramatically since the Industrial Revolution. However, their expectations stem from the same hopes and dreams people have had from the beginning of humankind. When Men Revolt and Why encourages readers to look closer and more deeply into the relationships between humans and the institutions that have originated to help them realize their full potential. The contributors not only examine people, but also the need to change institutions that have outworn their usefulness. When institutions inhibit rather than facilitate everyone's desire to live a full life, the result is likely to be violence. This book offers the ideas of many people who have tried to dig deeper into basic causes of violence. Included in this volume are selections by Aristotle, Tocqueville./Marx and Engels, and Brinton. The ideas they espoused still hold vitality. In his new introduction, James Davies talks about the circumstances under which this book was originally published. In Vietnam, a people were fighting

for their autonomy. In the United States, many Americans were protesting against American involvement in the Vietnam War. Blacks were marching for their civil rights. Women were fighting for equality. Time has tempered these conflicts. Davies maintains that we remain ignorant of the elemental forces that impel people and nations to resort to violence. We are usually surprised by their anger and shocked by their violence. Davies asserts that we need to learn more about how humans respond to change so as to prepare ourselves for such responses to change. *When Men Revolt and Why* is as timely as ever as we deal with uncertainty in various areas of the world—the former Yugoslavia, the Middle East, and Ireland, among others. It is especially pertinent for political scientists, historians, and sociologists. This book offers the ideas of many people who have tried to dig deeper into basic causes of violence. Included in this volume are selections by Aristotle, Tocqueville, Marx and Engels, and Brinton.

2011-03-24 This volume, the second in the Springer series *Philosophy of Science in a European Perspective*, contains selected papers from the workshops organised by the ESF Research Networking Programme PSE (*The Philosophy of Science in a European Perspective*) in 2009. Five general topics are addressed: 1. Formal Methods in the Philosophy of Science; 2. Philosophy of the Natural and Life Sciences; 3. Philosophy of the Cultural and Social Sciences; 4.

Philosophy of the Physical Sciences; 5. History of the Philosophy of Science. This volume is accordingly divided in five sections, each section containing papers coming from the meetings focussing on one of these five themes. However, these sections are not completely independent and detached from each other. For example, an important connecting thread running through a substantial number of papers in this volume is the concept of probability: probability plays a central role in present-day discussions in formal epistemology, in the philosophy of the physical sciences, and in general methodological debates—it is central in discussions concerning explanation, prediction and confirmation. The volume thus also attempts to represent the intellectual exchange between the various fields in the philosophy of science that was central in the ESF workshops. *Philosophy of the Physical Sciences 5 History of the Philosophy of Science* This volume is accordingly divided in five sections each section containing papers coming from the meetings focussing on one of these five themes.
