2009-01-08 Desde el punto de vista de la literatura económica es un tema que resulta importante y novedoso, las aportaciones efectuadas sobre un análisis conjunto de los efectos económicos de la inmigración y sus consecuencias para la política económica han sido escasas, y más si tenemos en cuenta su relevancia para diseñar una política europea común. Hay que destacar la amplitud de enfoques y el carácter multidisciplinar desde los cuáles se puede abordar su estudio. El fenómeno de la inmigración no sólo debe ser tratado, desde una esfera puramente económica, sino que deben considerarse asimismo los aspectos

jurídicos, sociológicos, geográficos, demográficos, históricos, éticos, políticos, culturales y de relaciones internacionales que aparecen estrechamente vinculados. La presente Tesis consta de seis capítulos. El primero de ellos está dedicado al análisis de los aspectos generales de la inmigración desde la vertiente multidisciplinar mencionada. El capítulo segundo se dedica al análisis de los aspectos teóricos de la inmigración planteándose teorías no económicas, es decir, sociológicas y jurídicas principalmente. En el tercero se estudian las consecuencias económicas de la inmigración, prestando especial atención a sus efectos sobre el mercado de trabajo del país de acogida, esto es, sobre los salarios de los trabajadores nativos y los niveles de desempleo. En el capítulo cuarto se incluye un análisis sobre la situación de España en materia de inmigración, a partir del estudio de las solicitudes de permiso de trabajo y de residencia. En el quinto se analizan los elementos que debe reunir una política económica de inmigración, para pasar a estudiar las ropuestas de política que

tradicionalmente se vienen aplicando en los países industriales. El último capítulo está dedicado a las políticas de inmigración europea y españolas, y se hacen propuestas como conclusiones obtenidas de la investigación. an lisis de los contextos economicos y demograficos de la Uni n y de los pases de origen pueden extraerse las L 180 19 7 2000 2 Por otra parte como resultado de la escasez 224 El fen meno de la inmigraci n consecuencias

2019-12-10 Contributing to the debate on work performance evaluation in a time of technological transformation, this book explores the impact of digitisation on production and organisation models, as well as on the rights and interests of the stakeholders involved. As organisations down-size, merge with other companies and become decentralised, the boundaries in employer-employee-customer relationships are blurred and new models for the organisation and assessment of work performance have emerged. With these new models, innovative regulatory approaches are sorely needed. Taking an interdisciplinary approach and drawing on theoretical concepts from organisation studies, human resource management, sociology and labour economics, this all-encompassing collection is not only essential reading for academics and students, but also for policy-makers and employers who are looking for innovative and practical solutions to the challenges of modern employment relations. 1980 Abstract: Developing countries start the decade facing two major challenges: to continue the social and economic progress of the past 30 years in an international climate that looks less helpful; and to tackle the plight of the 800 million people living in absolute poverty, who have benefitted too little from past progress. This report examines some of the difficulties and prospects in both areas. One of its central themes is the importance of people in development. The first part of the report addresses the expected sluggish world economic growth as oil-importing countries reduce their current account deficits and adapt to higher energy costs. Domestic policies of developing countries will be crucial, and the fate of poor people in these countries will be decided largely by domestic opportunities and policies. The second part of the report describes the role of human development programs (in education, health, nutrition, and fertility reduction) and their related effects on productivity and population growth. This report examines some of the difficulties and prospects in both areas. One of its central themes is the importance of people in development

2016-04-01 During the past few decades, industrialized countries have witnessed a progressive crisis of the regulatory framework sustaining the binary model of the employment relationship based on the subordinate employment/autonomous self-employment dichotomy. New atypical and hybrid working arrangements have emerged, challenging the traditional notions of, and divisions between, autonomy and subordination. This in turn has strained labour law systems across industrialized countries that were previously based on the notion of dependent and subordinate employment to cast their personal scope of application. Nicola Countouris advances ideas for a new dynamic equilibrium in employment law to accommodate this evolution, providing a comparative account of the development of the employment relationship in four key European countries - the UK, Germany, France and Italy. 2010 Diaspora & transnationalism are widely used concepts in academic & political discourses. Although originally referring to quite different phenomena, they increasingly overlap today. Such inflation of meanings

goes hand in hand with a danger of essentialising collective identities. This book analyses this topic. 1982 This book explores the relationship between the education farmers have received and their subsequent efficiency as farm operators. The concern is with the self-employed in agriculture, the small farmer. The study is concerned solely with ascertaining empirically the effect of schooling on agricultural efficiency and, when possible, the effect of access to information as measured by exposure to extension services. The study uses data from Korea, Malaysia, and Thailand; related findings from several other countries of Africa, Asia, and Latin America are reviewed. Surveys of individual farms provide the data used in the empirical analyses. Analyses from Thailand indicate that farmers of all educational levels are maximizing profits. However, more educated farmers do have higher levels of profits, which reflect the higher levels of productivity found in the production function analyses. Education has little effect on market efficiency. Higher levels of education and exposure to extension services increase the probabilities

of using chemical fertilizers. The effects of education were much more likely to be positive in modernizing agricultural environments rather than in traditional ones. This book explores the relationship between the education farmers have received and their subsequent efficiency as farm operators

2020-09-07 European citizenship is facing numerous challenges, including fundamental rights and social justice considerations. These get amplified in the context of Brexit and the general rise of populism in Europe today. This book takes a representative selection of these challenges, which raise a multitude of highly complex issues, as an invitation to provide a critical appraisal of the current state of the EU legal framework surrounding EU citizenship. The contributions are grouped in four parts, dealing with constitutional developments posing challenges to EU citizenship; the limits of the free movement paradigm in the context of EU citizenship; EU citizenship beyond free movement; and, lastly, EU citizenship in the context of the outside world, including Brexit, the EEA and Eurasian Economic Union. This book takes a representative selection of these challenges which raise a multitude of highly complex issues as an invitation to provide a critical appraisal of the current state of the EU legal framework surrounding EU citizenship

2013-11-26 The major Commentary on the Treaty on European Union (TEU) is a

European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of a “Europeanised research on Union law”. This publication in English contains detailed explanations, article by article, on all the provisions of the TEU as well as on several Protocols and Declarations, including the Protocols No 1, 2 and 30 and Declaration No 17, having steady regard to the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors of the Commentary are academics from ten European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law professionals. This should lead to more unity in European law notwithstanding all the legitimate diversity. The different traditions of constitutional law are reflected and mentioned by name thus striving for a common framework for European constitutional law. 2016 The mosaics of Ravenna are rated among the world's most important art works. Their quality and blaze of colour have intrigued believers and visitors since their making between the fifth and the seventh century. This book investigates the issue of the meaning of this imagery, its peculiarities, and the messages conveyed to the viewers through the centuries. It explores the function of the mosaics in the different buildings, and their interpretations in the relevant liturgical context by people living in late Antiquity. Several comparative examples integrate the mosaics in the frame of late Roman art. Written fluently on the basis of current state of research, the volume thus provides valuable new insight in one of the most fascinating sets of images of early Christian times. The mosaics were last subject to extensive investigation 40 years ago. Delve into the magnificence and variety of these mosaics, the colour photographs of which were made expressly for this book. They show the mosaics at close range and allow visual experiences that are impossible on site. This book investigates the issue of the meaning of this imagery its peculiarities and the messages conveyed to the viewers through the centuries

2014-01-28 EU Cohesion policy accounts for a major share of the EU budget and is central to economic and social development in many European countries. This book provides a comprehensive and theoretically-informed analysis of how Cohesion policy has

evolved over time, in particular the budgetary and policy dynamics of the 2007-13 reform. In the context of the budgetary politics of the EU, the book examines the process by which the reform of Cohesion policy has been shaped; it identifies the key factors that explain the allocation of funding, assesses the roles of the Member States, European Commission and European Parliament, and tests whether the process and outcome are consistent with the expectations of EU decision-making and integration theories. Based on extensive, EU-wide research over a ten-year period, the book provides new insights into both the process and outcomes of EU policy reform. Presenting original research in an accessible format, this book will be of interest to scholars as well as undergraduate and postgraduate students in the fields of European integration and policy studies. This book provides a comprehensive and theoretically informed analysis of how Cohesion policy has evolved over time in particular the budgetary and policy dynamics of the 2007 13 reform
