2018-05-04 A major problem with vampire bats is that whatever information exists is scattered throughout the literature or is not recorded. There are some excellent books on the ecology and biology of bats with very little on vampire bats. This volume fills that gap to provide an in-depth presentation of these unique animals. 2001-01-01 In *Life in Common* Tzvetan Todorov explores the construction of the self and offers new perspectives on current debates about otherness. Through the seventeenth century, solitude was considered the human condition in the Western philosophical tradition. The self was not dependent on others to perceive itself as complete. Todorov sees a reversal of this thinking beginning with the writings of Jean-Jacques Rousseau in the eighteenth century. For the first time the self was defined as incomplete without the other, and the gaze no longer served only to satisfy personal vanity but constituted the fundamental requisite for human identity. Todorov traces the far-reaching implications of Rousseau's new vision of the self and society through the political, philosophical, and psychoanalytical theories of Adam Smith, Georg Wilhelm Friedrich Hegel, Georges Bataille, Melanie Klein, and others, and the relevant literary works of Karl Philipp Moritz, the Marquis de Sade, and Marcel Proust. In an original study of the bond between parent and child, Todorov develops a compelling vision of the self as social. 2012-12-06 Twenty years is a long time in the life of a science. While the historical roots of psychology have not changed since the first edition of this book, some of the offshoots of the various theories and systems discussed have been critically reexamined

and have undergone far-reaching modifications. New and bold research has led to a broadening of perspectives, and recent developments in several areas required a considerable amount of rewriting. I have been fortunate in the last fifteen years to have worked with about 2,000 psychologists and other behavioral scientists who contributed to several collected volumes I have edited. As the editor-in-chief of the International Encyclopedia of Psychiatry, Psychology, Psychoanalysis and Neurology, I have had the privilege of reading, scrutinizing, and editing the work of 1,500 experts in psychology and related disciplines. In addition, I have written several books and monographs and over one hundred scientific papers. Armed with all that experience, I have carefully examined the pages of the first edition. Chapter 8 required substantial rewriting and several new sections have been added to other chapters: Current Soviet Psychology (Chapter 2, Section 7); New Ideas on Purposivism (Chapter 5, Section 4); Recent Developments in the Sociological School of Psychoanalysis (Chapter 9, Section 4); and Present Status of Gestalt Psychology (Chapter 12, Section 4). Chapter 15 was omitted, and two new chapters were added: Chapter 14 (Humanistic Psychology) and Chapter 16 (Selected Research Areas).
