1998-03-01 Until now, writings on the celebrated movements in literature and film that emerged in France in the mid-1950s - the New Novel and New Wave - have concentrated on their formal innovations, not on their engagement with history or politics. New Novel, New Wave, New Politics overturns this traditional approach. Lynn A.

Higgins argues that the New Novelists (e.g., Alain Robbe-Grillet, Claude Simon, Marguerite Duras) and New Wave filmmakers (e.g., Claude Chabrol, Francois Truffaut, Jean-Luc Godard, Alain Resnais) engage in a kind of historiography.... They enact the conflicts, the double binds of postwar history and representation. Higgins claims that what art historian Serge Guilbaut has said of American Abstract Expressionism is equally true of the New Novel and New Wave that its aesthetic innovations provided a way for avant-garde artists to preserve their sense of social 'commitment'... while eschewing the art of propaganda and illustration. It was in a sense a political apoliticism. Higgins shows how the New Novel and New Wave are related developments. While their individual styles and themes remain distinctive, she writes, they share an ecriture that can be described as alternately, or interconnectedly, filmic and novelistic. New Wave filmmakers borrowed novelistic devices and made frequent literary allusions, while the vision of the novelists is distinctly cinematic. A lively account that takes us to the crossroads where culture and politics meet, New Novel, New Wave, New Politics dramatically revises our view of a whole generation of important, influential artists. issues of Liberation are forthcoming from the University Press of New En gland in Richard J Golsan ed The I22 131 124 25 173 Sartres inability to define the Jew except as a purely negative quality and his

2014-07-16 Fruit ripening is an important aspect of fruit production. The timing of it affects supply chains and buying behaviour, and for consumers ripeness not only affects perceptions of health but has nutritional effects too. Ripeness is closely related to spoilage which has a major financial impact on agricultural industries. Currently there are fast moving developments in knowledge of the factors affecting fruit ripeness, and this up-to-date monograph seeks to draw together the disparate research in this area. The aim of the book is to produce a comprehensive account covering almost every area related to fruit ripening including the latest molecular mechanisms regulating fruit ripening, its impact on human nutrition and emerging research and technologies.
