2021-11-09 For the first time in English, a key work of critical geography Originally published in 1978 in Portuguese, For a New Geography is a milestone in the history of critical geography, and it marked the emergence of its author, Milton Santos (1926–2001), as a major interpreter of geographical thought, a prominent Afro-Brazilian public intellectual, and one of the foremost global theorists of space. Published in the midst of a crisis in geographical thought, For a New Geography functioned as a bridge between geography's past and its future. In advancing his vision of a geography of action and liberation, Santos begins by turning to the roots of modern geography and its colonial legacies. Moving from a critique of the shortcomings of geography from the field's foundations as a modern science to the outline of a new field

of critical geography, he sets forth both an ontology of space and a methodology for geography. In so doing, he introduces novel theoretical categories to the analysis of space. It is, in short, both a critique of the Northern, Anglo-centric discipline from within and a systematic critique of its flaws and assumptions from outside. Critical geography has developed in the past four decades into a heterogenous and creative field of enquiry. Though accruing a set of theoretical touchstones in the process, it has become detached from a longer and broader history of geographical thought. For a New Geography reconciles these divergent histories. Arriving in English at a time of renewed interest in alternative geographical traditions and the history of radical geography, it takes its place in the canonical works of critical geography. 1990-11-21 Noel Burch's new book is a critique of the assumptions underlying

'classical' approaches to film history: the assumption that what we call the language of film was a natural, organic development, that it lay latent from the outset in the basic technology of the camera, waiting for the prescient pioneers to bring it into being; and the assumption that this language was a universal, neutral medium, innocent of any social or historical meaning in itself. His major thesis is that, on the contrary, film language has a social and economic history, that it evolved in the way it did because of when and where it was constructed -- in the capitalist and imperialist west between 1892 and 1929. The book examines the chronology of the emergence of what it defines as cinema's Institutional Mode of Representation and the socio-historical circumstances in which this took place. It examines the principles of visualisation -- camera placement and movement, lighting, editing, mise-en-scene -- that film-makers and audiences came to internalize over the first three decades. Special emphasis is laid on the allimportant change that occurred in the imaginary placing of the spectator, from a position of exteriority to the film image, implicit in both film-form and viewing conditions during the primitive era (pre-1909), to the imaginary centering of the spectator-subject, completed only with the generalisation of lip-synch sound after 1929. It is the contention of this book that this imaginary centering of a sensorily isolated spectator is the keystone of the cinematic illusion of reality, still achieved today by the

same means as it was sixty years ago. This book examines the chronology of the emergence of what it defines as cinema's Institutional Mode of Representation and the socio historical circumstances in which this took place

2013-04-03 'Today the smallest details of our daily lives are tracked and traced more

closely than ever before, and those who are monitored often cooperate willingly with the monitors. From London and New York to New Delhi, Shanghai and Rio de Janeiro, video cameras are a familiar and accepted sight in public places. Air travel now commonly involves devices such as body-scanners and biometric checks that have proliferated in the wake of 9/11. And every day Google and credit-card issuers note the details of our habits, concerns and preferences, quietly prompting customized marketing strategies with our active, all too often zealous cooperation. In today's liquid modern world, the paths of daily life are mobile and flexible. Crossing national borders is a commonplace activity and immersion in social media increasingly ubiquitous. Today's citizens, workers, consumers and travellers are always on the move but often lacking certainty and lasting bonds. But in this world where spaces may not be fixed and time is boundless, our perpetual motion does not go unnoticed. Surveillance spreads in hitherto unimaginable ways, responding to and reproducing the slippery nature of modern life, seeping into areas where it once had only marginal sway. In this book the surveillance analysis of David Lyon meets the liquid modern world so insightfully dissected by Zygmunt Bauman. Is a dismal future of moment-by-moment monitoring closing in, or are there still spaces of freedom and hope? How do we realize our responsibility for the human beings before us, often lost in discussions of data and

categorization? Dealing with questions of power, technology and morality, this book is a brilliant analysis of what it means to be watched – and watching – today. 2005 Doing Business in 2005: Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in Doing Business in 2005 include: Licensing and Inspections: Having registered a business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The Doing

Business database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights-the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, Doing Business not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. Doing Business is a

comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without. The indicators are used to analyze economic outcomes and identify what reforms have worked where and why Topics in Doing Business in 2005 include Licensing and Inspections Having registered a business now what

1993 By comparing Spanish artist Joan Miro's finished paintings and sculptures with more than 1200 of his sketches and preparatory studies, Gimferrer places Miro's art in a surprising new perspective. Marvelously illustrated with 285 radiant color plates and 1276 in black-and-white, this

intensive analysis of Miro's creative process explains how he would first isolate some element from the teeming outside world, then incorporate a graphic sign into it, thus setting in motion a transfigurative process in which objects, signs and symbols underwent a constant metamorphosis. In placing Miro's preliminary drawings alongside the pictures to which they gave rise, Spanish poet and art critic Gimferrer illuminates the inner alchemy by which Miro discovered his major motifs and set them loose in a free-floating pictorial universe.
