1998 This book, which can be used as a text for teaching purposes, gives a

fascinating, and authoritative treatment both the rights protected by the Inter-American system and of the way in which its institutions work. An important part of the book is a thorough, article by article account of the guarantee in the American Declaration of the Rights and Duties of Man and in the American Convention on Human Rights of civil, political, economic, social and cultural rights in the light of the jurisprudence of the Inter-American Commission on Human Rights and the Inter-American Court of Human Rights, and of the Commission's many country reports on the human rights situation in particular states. There are also chapters on the rights of indigenous peoples, amnesty laws and states of emergencies. The evolution and current methods of work of the Commission and the Court are set out at length and their achievements are critically assessed. The role of non-governmental organisations is also examined in this context. The book will be invaluable to all those interested in the protection of human rights in the Americas and international human rights law generally. This book which

2019-08-20 First published in 1976. Economics has always been in a crisis since it broke away from social philosophy in the late eighteenth century. But from time to time this crisis has been particularly acute. Such was the case at the turn of the last century when the classical predictions proved less and less true and, in response, the marginalist schools emerged. Such also was the case at the beginning of the 1930s when the proof of the established harmony propounded in that theory was contradicted by the Great Depression, giving rise to the new macroeconomics pioneered by Keynes. doubt that contemporary economics is in a crisis, at least if crisis is defined as the inability to meet the challenge of the times. Problems like mass poverty, unbalanced affluence, increasing regional economic disparities, imbalances in population development, irrational disposition of non-renewable resources, and production and consumption processes ill-adjusted to the limited carrying capacity of the environment are among many pressing problems awaiting solution by economists. The purpose of this book is to bring together responses from leading economists to these problems. Given

the vast subject matter, it is only to be expected that the specific emphasis given to various approaches differs among the authors. 2013-05-03 Globalization is characterised by persistent poverty and growing inequality. Conventional wisdom has it that this global poverty is residual - as globalization deepens, the poor will be lifted out of destitution. The policies of the World Bank, the IMF and the WTO echo this belief and push developing countries ever deeper into the global economy. Globalization, Poverty and Inequality provides an alternative viewpoint. It argues that for many - particularly for those living in Latin America, Asia and Central Europe - poverty and globalization are relational. It is the very workings of the global system which condemn many to poverty. In particular the mobility of investment, and the large pool of increasingly skilled workers in China and other parts of Asia, are driving down global wages. This poses challenges for policy makers in firms and countries throughout the world. It also challenges the very sustainability of globalisation itself. Are we about to witness the implosion of globalisation, as occurred between 1913 and 1950? Using a variety of theoretical

frameworks and drawing on a vast amount of original research, this book will be an invaluable resource for all students of globalization and its effects. 2018-08-26 This anthology opens new perspectives in the domain of history, philosophy, and science teaching research. Its four sections are: first, science, culture and education; second, the teaching and learning of science; third, curriculum development and justification; and fourth, indoctrination. The first group of essays deal with the neglected topic of science education and the Enlightenment tradition. These essays show that many core commitments of modern science education have their roots in this tradition, and consequently all can benefit from a more informed awareness of its strengths and weaknesses. Other essays address research on leaning and teaching from the perspectives of social epistemology and educational psychology. Included here is the first ever English translation of Ernst Mach's most influential 1890 paper on 'The Psychological and Logical Moment in Natural Science Teaching'. This paper launched the influential Machian tradition in education.

Other essays address concrete cases of the utilisation of history and philosophy in the development and justification of school science curricula. These are instances of the supportive relation of HPS&ST research to curriculum theorising. Finally, two essays address the topic of Indoctrination in science education; a subject long-discussed in philosophy of education, but inadequately in science education. This book is a timely reminder of why history and philosophy of science are urgently needed to support understanding of science. From major traditions such as the Enlightenment to the tensions around cultural studies of science, the book provides a comprehensive context for the scientific endeavour, drawing on curriculum and instructional examples. Sibel Erduran, University of Oxford, UK The scholarship that each of the authors in this volume offers deepens our understanding of what we teach in science and why that understanding matters. This is an important book exploring a wide set of issues and should be read by anyone with an interest in science or science education. Jonathan Osborne, Stanford University, USA This volume presents new and updated perspectives in the field, such as the Enlightenment Tradition, Cultural Studies, Indoctrination in Science Education, and Nature of Science. Highly recommended. Mansoor Niaz, Universidad de Oriente, Venezuela This volume provides an extremely valuable set of insights into educational issues related to the history and

philosophy of science. 2008-09-10 The Doing Business series provides research, data, and analysis on regulation in 181 economies across 10 areas of the business life cycle. Doing Business

2009 identifies top reformers in business regulation and highlights best practices and global reform trends. This year's report builds upon the five previous editions, adding new economies and updating all indicators. This year's report covers 3 additional economies, bringing the total number of economies covered to 181. Now included are the Bahamas, Bahrain, and Qatar. The report also adds a preface on Doing Business methodology, as well as in-depth analysis throughout the report on the main trends and findings of the past six years of Doing Business. Doing Business is an invaluable resource for entrepreneurs, investors, advisors, academics, professionals, and policymakers. The indicators benchmark regulation across 10 areas of a typical business lifecycle, and are used to analyze economic and social outcomes that matter such as equal opportunity, unemployment, poverty, and growth. This annually-published report gives policymakers the ability to

measure regulatory performance in comparison to other economies, and learn from best practices. The Doing Business series provides research data and analysis on regulation in 181 economies across 10 areas of the business life cycle
