2012-08-06 Groundwater Science, 2E, covers groundwater's role in the hydrologic cycle and in water supply, contamination, and construction issues. It is a valuable resource for students and instructors in the geosciences (with focuses in hydrology, hydrogeology, and environmental science), and as a reference work for professional researchers. This interdisciplinary text weaves important methods and applications from the disciplines of physics, chemistry, mathematics, geology, biology, and environmental science, introducing you to the mathematical modeling and contaminant flow of groundwater. New to the Second Edition:.. New chapter on subsurface heat flow and geothermal systems. Expanded content on well construction and design, surface water hydrology, groundwater/surface water interaction, slug tests, pumping tests, and mounding analysis.. Updated discussions of groundwater modeling, calibration, parameter estimation, and uncertainty. Free software tools for slug test analysis, pumping test analysis, and

provides detailed coverage of both theory and practice. Written by a leading hydrogeologist who has consulted for industry and environmental agencies and taught at major universities around the world, this unique Coupling the basics of hydrogeology with analytical and numerical modeling methods Hydrogeology and Groundwater Modeling Second Edition provides detailed coverage of both theory and practice

2012-08-24 A British Naval commander's eyewitness account of the 1982 war in the South Atlantic. Since he was in charge of the amphibious operations in the Falklands War, it goes without saying that there is no one better qualified to tell the story of that aspect of the campaign than Commodore Michael Clapp. Here he describes, with considerable candor, some of the problems met in a Navy racing to war and finding it necessary to recreate a largely abandoned operational technique in a somewhat ad hoc fashion. During the time it took to "go south," some sense of order was imposed and a not very well defined command structure evolved, this was not done without generating a certain amount of friction. He tells of why San Carlos Water was chosen for the assault and the subsequent inshore operations. Michael Clapp and his small staff made their stand and can claim a major role in the defeat of the Argentine Air and Land

2007-11-01 Christian Jacq, author of the international triumphs Ramses and The Stone of Light, brings the people and passions of ancient Egypt to life in an enthralling epic novel in three volumes. Egypt is a shadow of its former self. An army of barbarians mounted on horse-drawn chariots has swept through the Empire, destroying everything in its path. Known as the Hyksos, these leaders from foreign lands have reduced the country of the pharaohs to slavery. Only the city of Thebes resists, protected by the widow of the last pharaoh, Teti the Small. But Teti knows that her reign is limited, that it's only a matter of time before her men succumb to the barbarities of the cruel Hyksos. She has an eighteen-year-old daughter, however: Ahhotep. Fierce, beautiful, and courageous, this girl whom history will call Egypt's Joan of Arc will never accept defeat. And so she decides to re-ignite the flame of Egyptian resistance. All by herself. Combining historical fact with a vivid imagination, Christian Jacq tells the enthralling true story of this Ancient Egyptian warrior-heroine. Without the courage and passion of Queen Ahhotep, the Valley of the Kings and the glorious treasures of the pharaohs, including Ramses the Great, would

never have existed. And so she decides to re-ignite the flame of Egyptian resistance All by herself Combining historical fact with a vivid imagination Christian Jacq tells the enthralling true story of this Ancient Egyptian warrior heroine

2012-03-12 This book argues that psychoanalysis has a unique role to play in the climate change debate through its placing emphasis on the unconscious dimensions of our mental and social lives. Exploring contributions from Freudian, Kleinian, Object Relations, Self Psychology, Jungian, and Lacanian traditions, the book discusses how psychoanalysis can help to unmask the anxieties, deficits, conflicts, phantasies and defences crucial in understanding the human dimension of the ecological crisis. Yet despite being essential to studying environmentalism and its discontents, psychoanalysis still remains largely a 'psychology without ecology.' The philosophy of Deleuze and Guattari, combined with new developments in the sciences of complexity, help us to build upon the best of these perspectives, providing a framework able to integrate Guattari's 'three ecologies' of mind, nature and society. This book thus constitutes a timely attempt to contribute towards a critical dialogue between psychoanalysis and ecology. Further topics of discussion include: ecopsychology and the greening of psychotherapy our ambivalent relationship to nature and the non-human complexity theory

in psychoanalysis and ecology defence mechanisms against eco-anxiety and eco-grief Deleuze|Guattari and the three ecologies becoming-animal in horror and eco-apocalypse in science fiction films nonlinear ecopsychanalysis. In our era of anxiety, denial, paranoia, apathy, guilt, hope, and despair in the face of climate change, this book offers a fresh and insightful psychoanalytic perspective on the ecological crisis. As such this book will be of great interest to all those in the fields of psychoanalysis, psychology, philosophy, and ecology, as well as all who are concerned with the global environmental challenges affecting our planet's future. This book argues that psychoanalysis has a unique role to play in the climate change debate through its placing emphasis on the unconscious dimensions of our mental and social lives

2015-06-12 In this groundbreaking book, Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats. By highlighting unconscious and affective dimensions of contemporary ecological issues, Lertzman deconstructs the idea that there is a gap between what people care about and what is actually carried out in policy and personal practice. In doing so, she presents an innovative way to think about and design engagement practices and policy interventions. Based on key qualitative fieldwork and in-depth interviews conducted

in Green Bay, Wisconsin, each chapter provides a psychosocial, psychoanalytic perspective on subjectivity, affect and identity, and considers what this means for understanding behaviour in relation to environmental crises and climate change. The book argues for a theory of environmental melancholia that accounts for the ways in which people experience profound loss and disruption caused by environmental issues, and yet may have trouble expressing or making sense of such experiences. Environmental Melancholia offers a fresh perspective to the field of environmental psychology that until now has been largely dominated by research in cognitive, behavioural and social psychology. It will appeal to academics, researchers and postgraduate students in the fields of psychoanalysis, psychosocial studies and sustainability, as well as policy makers and educators internationally. In this groundbreaking book Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats

2021-04 As the firing died down and the merciless bombardment ended, the Argentine forces in and around Stanley, the capital of the Falkland Islands, were forced to surrender. As the detritus of war was burned or buried over time, healing the scars across the land, which faded faster than the scars in the minds of the men who fought in this

terrible conflict, one bundle of papers survived. They were the letters which never made it home on the last flight out of the war zone before the final battle ended: the letters of a group of Argentine soldiers who recount the hope and the horror of their daily lives alongside some of the most dramatic and famous events in the war's history, telling the story as it is - gritty and visceral - against the backdrop of the war which the junta's press machine tells their families they are winning. Carrying the hopes of their nation on their shoulders, the men who fought the war for a place they called Malvinas - a place

they were taught to love but never knew - tell the untold story of the war first hand. As veteran historian Ricky D Phillips fills in the canvas around them and tells the story of the Argentine army at war, of the men who fought in the conflict, and attempts to track down the authors of the Last Letters from Stanley.
