Catalonia 'Spain not only defined Orwell as an individual, it also gave him his first glimpse of totalitarianism' D. J. Taylor, Guardian George Orwell's experience of the Spanish Civil War had a transformative effect on his life and work. This volume brings together his complete writings on the war, including Homage to Catalonia, his searing memoir of fighting in the conflict and the bitter betrayal that followed. The powerful journalism, essays, letters and pamphlets also collected here show his resolution to tell the truth about what happened amid a 'crop of lies' from both the Communist Party and the British press, while in 'Looking Back on the Spanish War' he remembers the heroism and decency of the ordinary people he encountered. 2013-05-13 This is the first world-wide, comparative study of the controversial new trends of gender quotas now emerging in global politics, presenting a comprehensive overview of changes in women's parliamentary representation across the world. This is important reading for all those working to increase women's influence in politics, because it scrutinizes under what circumstances gender quotas do increase women's representation - and why they sometimes fail. These distinguished international scholars also show how gender balance in politics has become important to a nation's international image and why quotas are being introduced in many post-conflict countries. They present key case studies of Afghanistan, Iraq, Argentina, Sweden, South Africa, Belgium, covering almost all major regions of the world: Latin America, Africa, the Arab world, South Asia, the Balkans, The Nordic countries and Europe, New Zealand, Australia and the USA - and Rwanda, which in 2003 unexpectedly surpassed Sweden as the number one country in the world in terms of women's parliamentary representation. Using a comparative perspective, this book contains

analyses of the discursive controversies around quotas; it gives an overview over various types of quotas in use from candidate quotas to reserved seat systems, and it throws light over the troublesome implementation process. When do gender quotas lead to actual increase in the number of women parliament? When are quotas merely a symbolic gesture? What does it imply to be elected as a 'quota woman'? Tackling these and many more key questions, this is a major new contribution to the field. Making an important contribution to our knowledge of gender politics worldwide, this book will be of interest to NGOs, students and scholars of democracy, policy-making, comparative politics and gender studies. 2016-07-27 The Third World debt crisis, the International Monetary Fund and World Bank's adjustment policies have compelled many countries to move towards a contraction of public sector expenditure in favour of market orientated development policies. analytical frameworks of governments and financial organisations and offers alternative strategies for combating recession and poverty. 2010-07-29 The Spanish Civil War has gone down in history for the horrific violence that it generated. The climate of euphoria and hope that greeted the overthrow of the Spanish monarchy was utterly transformed just five years later by a cruel and destructive civil war. Here Julián Casanova, one of Spain's leading historians, offers a magisterial new account of this critical period in Spanish history. He exposes the ways in which the Republic brought into the open simmering tensions between Catholics and hardline anticlericalists, bosses and workers, Church and State, order and revolution. In 1936 these conflicts tipped over into the sacas, paseos and mass killings which are still passionately debated today. The book also explores the decisive role of the international instability of the 1930s in the duration and outcome of the conflict. Franco's victory was in the end a victory for Hitler and Mussolini and for dictatorship over democracy. The book also explores the decisive role of the international instability of

1992-08-24 The debt crisis and global economic changes of the 1980s caused Third World nations to restructure economic policies, community resources, the labor market, and intra-household divisions of labor. These changes swelled the ranks of the unemployed, the poor, and the malnourished. Women, in particular, were affected negatively by processes of structural adjustment because they represent a disproportionate share of the world's poor, are increasingly represented among low-wage workers, and are forced to balance wage work with subsistence and domestic production in meeting household needs. Using country-based studies, this text offers new perspectives on the consequences of economic crisis in terms of changing state practices and household and family organization, patterns of resource allocation, and women's work. 1991-02-21 This book draws on a mass of documentary material to provide a major reinterpretation of British labour's response to the Spanish Civil War. It challenges the view that the labour leadership 'betrayed' the Spanish Republic, and that this polarised the movement along 'left' versus 'right' lines. Instead, it argues that the overriding concern of the major leaders was to defend labour's institutional interests against the political destabilisation caused by the conflict, rather than to defend Spanish democracy. Although the main advocates of this position were trade union leaders associated with the labour right such as Walter Citrine and Ernest Bevin, the book argues that their dominance reflected the centrality of the trade unions to labour movement decision-making rather than the abuse of union power to achieve political goals. 1994 This collection captures the vitality and urgency of feminists' responses to the environment and development debate. The authors - researchers, activists and policy-makers from North and South - offer new ways of challenging the present dominating knowledge-systems and development institutions, and discuss the difficulties women face on the margins of the development process. Contributions on resource management, power, knowledge production, culture, development institutions and politics, health and economics, show how gender relations are not simply a footnote to our understanding of history and societies, but must be central to the development discourse. In so doing, they suggest that diversity itself is necessary to the creation of new paradigms of development that are built upon gender equity, secure livelihoods, ecological sustainability and political participation.
