2000 Colour is all around us; we take it for granted as a naturally occurring element of all things. Yet colours are also manufactured, and the science of pigments,

hues and dyes has an ancient and fascinating history. This book surveys the story of dyes and pigments, the invention of new colours and the industries that were fuelled by them. What were the colours of ancient Egypt? What did its artists use to paint their magnificent frescoes? Where do indigo and ochre come from? Why is purple the colour of royalty? What are pastels? How many colours are there? Why do we dye our food? Who invented ink? What is the symbolism of yellow? From cerise to crimson, from puce to periwinkle, this book is as rich, varied and delightful as a box of crayons. 2015-01-06 *Painting in Latin America, 1550-1820: From Conquest to Independence* surveys the diverse styles, subjects, and iconography of painting in Latin America between the 16th and 19th centuries. While European art forms were widely disseminated, copied, and adapted throughout Latin America, colonial painting is not a derivative extension of Europe. The ongoing debate over what to call it--mestizo, hybrid, creole, indo-hispanic, tequitqui--testifies to a fundamental yet unresolved question of identity. Comparing and contrasting the Viceroyalties of New Spain, with its center in modern-day Mexico, and Peru, the authors explore the very different ways the two regions responded to the influence of the Europeans and their art. A wide range of art and artists are considered, some for the first time. Rich with new photography and primary research, this book delivers a wealth of new insight into the history of images and the history of art. This book is the first survey of painting in Latin America from the Spanish conquest to independence

This invaluable reference reframes information formerly found only in specialized technical and industrial publications for the context of cultural heritage conservation. As the first book to address the properties, testing, and maintenance issues of the hundreds of metals and alloys available since the beginning of the twentieth century, it is destined to become an essential resource for conservators, artists, fabricators, curators, collectors, and anyone working with modern metals. 2014-09-23 A hilarious yet deeply

moving coming-of-age novel from New York Times bestselling author Caitlin Moran, “the U.K.’s answer to Tina Fey, Chelsea Handler, and Lena Dunham all rolled into one” (Marie Claire) What do you do in your teenage years when you realize what your parents taught you wasn’t enough? You must go out and find books and poetry and pop songs and bad heroes—and build yourself. It’s 1990. Johanna Morrigan, fourteen, has shamed herself so badly on local TV that she decides that there’s no point in being Johanna anymore and reinvents herself as Dolly Wilde—fast-talking, hard-drinking Gothic hero and full-time Lady Sex Adventurer! She will save her poverty-stricken Bohemian family by becoming a writer—like Jo in *Little Women*, or the Bröntes—but without the dying young bit. By sixteen, she’s smoking cigarettes, getting drunk and working for a music paper. She’s writing pornographic letters to rock stars, having all kinds of sex with all kinds of men and eviscerating bands in reviews of 600 words or less. But what happens when Johanna realizes she’s built Dolly with a fatal flaw? Is a box full of records, a wall full of posters and a head full of paperbacks enough to build a girl after all? Imagine *The Bell Jar*—written by Rizzo from *Grease*. *How to Build a Girl* is a funny, poignant and heartbreakingly evocative story of self-discovery and invention, as only Caitlin Moran could tell it. 2006-10-10 NATIONAL BESTSELLER • A groundbreaking work of science, history, and archaeology that radically alters our understanding of the Americas before the arrival of Columbus in 1492—from “a remarkably engaging writer” (The New York Times Book Review). Contrary to what so many Americans learn in school, the pre-Columbian Indians were not sparsely settled in a pristine wilderness; rather, there were huge numbers of Indians who actively molded and influenced the land around them. The astonishing Aztec capital of Tenochtitlan had running water and

immaculately clean streets, and was larger than any contemporary European city. Mexican cultures created corn in a specialized breeding process that it has been called man's first feat of genetic engineering. Indeed, Indians were not living lightly on the land but were landscaping and manipulating their world in ways that we are only now beginning to understand. Challenging and surprising, this a transformative new look at a rich and fascinating world we only thought we knew. 2012-05-23 Today, architects and designers are beginning to look toward developments in new smart or intelligent materials and technologies for solutions to long-standing problems in building design. However, these new materials have so far been applied in a diverse but largely idiosyncratic nature, because relatively few architects have access to information about the types or properties of these new materials or technologies. Two of the leading experts in this field - Addington and Schodek - have solved this problem by incorporating all the relevant information of all the latest technologies available to architects and designers in this one volume. They present materials by describing their fundamental

characteristics, and go on to identify and suggest how these same characteristics can be exploited by professionals to achieve their design goals. Here, the wealth of technical understanding already available in the materials science and engineering literature is at last made accessible to a design audience. Two of the leading experts in this field Addington and Schodek have solved this problem by incorporating all the relevant information of all the latest technologies available to architects and designers in this one volume

1984 The Paris of the 1860s and 1870s was supposedly a brand-new city, equipped with boulevards, cafes, parks, and suburban pleasure grounds--the birthplace of those habits of commerce and leisure that constitute modern life. Questioning those who view Impressionism solely in terms of artistic technique, T. J. Clark describes the painting of Manet, Degas, Seurat, and others as an attempt to give form to that modernity and seek out its typical representatives--be they bar-maids, boaters, prostitutes, sightseers, or petits bourgeois lunching on the grass. The central question of The Painting of Modern Life is this: did modern painting as it came into being celebrate the consumer-oriented culture of the Paris of Napoleon III, or open it to critical scrutiny? The revised edition of this classic book includes a new preface by the author. The revised edition of this classic book includes a new preface by the author from the

2000-01-01 Drawing on scientific studies of pigments and materials, artists' treatises, colourmen's archives, and contemporary and modern accounts, Anthea Callen demonstrates how raw materials and paintings are profoundly interdependent. She analyses the material constituents of oil painting and the complex processes of 'making' entailed in all aspects of artistic production, discussing in particular oil painting methods for landscapists and the impact of plein air light on figure painting, studio practice and display. Insisting that the meanings of paintings are constituted by and within the cultural matrices that produced them, Callen argues that the real 'modernity' of the Impressionist enterprise lies in the painters' material practices.--BOOK JACKET. 2004-04-09 Christopher Columbus returned to Europe in the final days of 1500, ending his third voyage to the Indies not in triumph but in chains. Seeking to justify his actions and protect his rights, he began to compile biblical texts and excerpts from patristic writings and medieval theology in a manuscript known as the Book of Prophecies. This unprecedented collection was designed to support his vision of the discovery of the Indies as an important event in the process of human salvation - a first step toward the liberation of Jerusalem and the Holy Land from Muslim domination. This work is part of a twelve-volume series produced by

U.C.L.A.'s Center for Medieval and Renaissance Studies which involved the collaboration of some forty scholars over the course of fourteen years. In this volume of the series, Roberto Rusconi has written a complete historical introduction to the Book of Prophecies, describing the manuscript's history and analyzing its principal themes. His edition of the documents, the only modern one, includes a complete critical apparatus and detailed commentary, while the facing-page English translations allow Columbus's work to be appreciated by the general public and scholars alike.
