2008-03-03 Written in Irvin Yalom's inimitable story-telling style, Staring at the Sun is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr Yalom helps us recognise that the fear of death is at the heart of much of our day-to-day anxiety. This reality is often brought to the surface by an 'awakening experience' — a dream, a loss (such as the death of a loved one, a divorce, or the loss of a job or home), illness, trauma, or ageing. Once we confront our own mortality, Dr Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for

personal fulfillment. This is a book with tremendous utility, including the provision of techniques for dealing with the most prevalent kinds of fears of death — especially by living in the here and now, and by embracing what Dr Yalom calls ‘rippling’, the influence and impact we all have that has a life beyond our own. 1995-09-01 With *Building in France, Building in Iron, Building in Ferroconcrete* (1928)—published now for the first time in English—Sigfried Giedion positioned himself as an eloquent advocate of modern architecture. This was the first book to exalt Le Corbusier as the artistic champion of the new movement. It also spelled out many of the tenets of Modernism that are now regarded as myths, among them the impoverishment of nineteenth-century architectural thinking and practice, the contrasting vigor of engineering innovations, and the notion of Modernism as technologically preordained. 2022-05-17 An essential exploration of the engineering aesthetics of celebrated structures from long-span bridges to high-rise buildings What do structures such as the Eiffel Tower, the Brooklyn Bridge, and the concrete roofs of Pier Luigi Nervi have in common? According to *The Tower and the Bridge*, all are striking examples of structural art, an exciting area distinct from either architecture or machine design. Aided by stunning photographs, David Billington discusses the technical concerns and artistic principles underpinning the well-known projects of leading structural engineer-artists, including Othmar Ammann, Félix Candela, Gustave Eiffel, Fazlur Khan, Robert Maillart, John Roebling, and many others. A classic work, *The Tower and the Bridge* introduces readers to the fundamental aesthetics of engineering. 2021-09-07 *Picasso in dialogue with the Iberian holdings of the Louvre* Although he spent most of his adult life in France, painter Pablo Picasso (1881-1973) never denied the artistic influence that his upbringing in Spain imparted upon him. Of particular significance was the art and culture of the Iberian Peninsula where he had been born and later lived as a young man, though it was likely that his first real encounter with Iberian art took place at the Louvre in France. This

volume accompanies a curatorial collaboration between the Centro Botín in Spain and the Musée Picasso-Paris in France that explores Picasso's relationship with Iberian art on an unprecedented scale. The book demonstrates this rich connection by comparing works by Picasso with masterpieces from the Louvre's Iberian collection and major Spanish archaeological museums. Further context provided by the world's leading experts in Iberian art conveys the depth of Picasso's cultural and artistic dialogue with his birthplace. 2015-01-06 Painting in Latin America, 1550-1820: From Conquest to Independence surveys the diverse styles, subjects, and

iconography of painting in Latin America between the 16th and 19th centuries. While European art forms were widely disseminated, copied, and adapted throughout Latin America, colonial painting is not a derivative extension of Europe. The ongoing debate over what to call it--mestizo, hybrid, creole, indo-hispanic, tequitqui--testifies to a fundamental yet unresolved question of identity. Comparing and contrasting the Viceroyalties of New Spain, with its center in modern-day Mexico, and Peru, the authors explore the very different ways the two regions responded to the influence of the Europeans and their art. A wide range of art and artists are considered, some for the first time. Rich with new photography and primary research, this book delivers a wealth of new insight into the history of images and the history of art. This book is the first survey of painting in Latin America from the Spanish conquest to independence

2003 Emilia Ferreiro is one of the great thinkers in the Americas on the issues surrounding literacy. Three of her most important lectures are presented in this book. Her views have changed the systems of education in her own country, Mexico, and have had a radical impact on education in Brazil, where she is the recipient of the country's highest distinction. Her ideas have ideological and political implications for policies regarding publishing (including the publishing of textbooks), access to books and the development of readers all over the world. Although poor countries have not overcome illiteracy, rich countries are finding that a basic education does not guarantee fully functional readers. While some of us are fluent in the language of hypertext, e-mail and the virtual pages of non-existent books,

there are others who have not mastered newspapers or books. If democracy is incompatible with an illiterate citizenry, full democracy requires an ability to read that goes beyond the deciphering of words. This ability is the right of children who will grow up as free citizens in a world where linguistic and cultural diversity are as important as biodiversity.--BOOK JACKET. 2012-05-30 The concept of time has fascinated humanity throughout recorded history, and it remains one of the biggest mysteries in science and philosophy. Time is clearly one of the fundamental building blocks of the universe and thus a deeper understanding of nature at a fundamental level also demands a comprehension of time. Furthermore, the origins of the universe are closely intertwined with the puzzle of time: Did time emerge at the Big Bang? Why does the arrow of time 'conspire' with the order of the initial state of the universe? This book addresses many of the most important questions about time: What is time, and is it fundamental or emergent? Why is there such an arrow of time, closely related to the initial state of the universe, and why do the cosmic, thermodynamic and other arrows agree? These issues are discussed here by leading experts, and each offers a new perspective on the debate. Their contributions delve into the most difficult research topic in physics, also describing the latest cutting edge research on the subject. The book also offers readers a comparison between the different outlooks of philosophy, physics and cosmology on the puzzle of time. This

volume is intended to be useful for research purposes, but most chapters are also accessible to a more general audience of scientifically educated readers looking for deeper insights. 2014 Modern taste: Art Deco in Paris, 1910-1935' offers readers an opportunity to appreciate, examine, assess and enjoy an artistic movement that defies easy definition but which has been described as the last of the total styles: Art Deco.0The book aims to question the almost total absence of Art Deco from the history of modern art and from curatorial practice, and to vindicate--as some exemplary cases did in the wake of the Deco revival from the 1970s onwards--not only the evident beauty of Art Deco but also the fascination exerted by this singularly modern phenomenon with all its cultural and artistic complexity.0What we know as Art Deco was an alternative style to the avant-garde. It stood for a modernity that was pragmatic and ornamental rather than utopian and functional, and it became the great shaper of modern desire and taste, leaving its characteristic stamp on Western society and capitalism in the early decades of the 20th century.0Comprehensive and beautifully designed, 'Modern taste' includes nearly 400 works in a wide array of media:

painting, sculpture, furniture, fashion design, jewelry, film, architecture, glassware and ceramics are all represented, alongside the photography, drawings and advertisements that helped create the modern taste.0Exhibition: Fundación Juan March, Madrid, Spain (26.03-28.06.2015).
