2014-06-28 The Paper-making Machine: It's Invention, Evolution and Development covers the history of the paper-making machine and its origin and how it developed. This book is organized into 15 chapters, and starts with the discussion of the origin of the first paper-machine way back from A.D. 105 in China. The subsequent chapter deals with the development of the paper-machine where the British improved the machine and were then widely used by people. This topic is followed by discussions on the progress of paper making in 1830-1835 where an

advanced type of Fourdrinier machine was introduced by Matthew Towgood and Leapidge South. Other chapters describe further improvements on the Fourdrinier machines and the paper-makings on the late 1800's. The last chapter considers the standardization of the paper-making machine during 1870-1890. This book will be of value to machine inventors and those who work in printing presses. 2022-11-08 This book is the first that describes the practices of any stock exchange; it makes evident a high development of practices, with puts, calls, pools, and manipulations; and it appeared as early as the seventeenth century. Not inappropriately the stock exchange described is that of Amsterdam, a city which at the date of the volume's publication —1688 — was still the leading financial center of the world. The book, to be sure, is hardly a systematic account of the institution; the author pursued moral, philosophical, and rhetorical objectives, and, while saying a lot that seems now to be of little value, manages somehow to leave unsaid a great deal that would be of interest for us. Nevertheless, it represents, even in its peculiar form, a really important source of

information about the stock exchange, and indeed about the Dutch business world of that period. 2013-09-12 Lexicon of Plant Pests and Diseases is a companion book to Elsevier's Lexicon of Parasites and Diseases in Livestock (1964). It is based on identical principles and is developed along the same lines, viz. one part as wide as possible in scope, systematically covering all living forms which are noxious, destructive or otherwise unfavorable to economic crops, trees, and plant products; and a second part made up of indexes to the six languages (Latin, English, French, Spanish, Italian, and German). The indexes facilitate retrieval of any desired term in the basic table. The table of contents explains fully the scope of the lexicon. Entries in the lexicon are arranged alphabetically within each section, according

to the Latin name of the living form. In the Appendices English is the key language. clavel 535 verde de las yemas 362 traqueovorticilosis de la patata 1920 del algodono 1921 tr bol anguilulosis del 21 antracnosis del 1846 api n del 571 blanco mosaico del 1260 cecidomia de las hojas del 829 c scuta del
