2001-03-01 Adopting a multi-disciplinary approach, Decentralised Sanitation and Reuse places public sanitation in a global context and provides a definitive discussion of current state-of-the-art sanitation technologies. It shows how these technologies can be implemented to integrate domestic waste and wastewater treatment in order to maximize resource recycling in domestic practice. Decentralised Sanitation and Reuse presents technical solutions for on-site collection and transport of concentrated waste streams, and focuses on the compromise between reliability and minimal water wastage. A whole range of available sustainable technologies, both low and high-tech, to treat concentrated (black water) and diluted (grey water) streams are addressed in detail from the fundamental scientific and engineering points of view. Sociological, economic and, particularly, environmental and public health aspects are

essential issues within this book. The necessity of new infrastructure implementation and the resulting challenges for a good number of economic branches are illustrated with examples from architecture and town planning. Decentralised Sanitation and Reuse will be an invaluable resource for a wide academic and professional readership active in the fields of environmental protection and public sanitation. 2020-07-08 This book explores the
relationship between the safety of journalists
and self-censorship practices around the
world, including local case studies and

regional and international perspectives.
Bringing together scholars and practitioners
from around the globe, Journalist Safety and
Self-Censorship provides new and updated
insights into patterns of self-censorship and
free speech, focusing on a variety of factors
that affect these issues, including
surveillance, legislation, threats, violent
conflict, gender-related stereotypes,
digitisation and social media. The
contributions examine topics such as trauma,
risk and self-censorship among journalists in
different regions of the world, including
Central America, Estonia, Turkey, Uganda
and Pakistan. The book also provides
conceptual clarity to the notion of journalist
self-censorship, and explores the question of
how self-censorship may be studied
empirically. Combining both theoretical and
practical knowledge, this collection serves as
a much-needed resource for any academic,
student of journalism, practicing journalist, or
NGO working on issues of journalism, safety,
free speech and censorship. This book
explores the relationship between the safety
of journalists and self censorship practices
around the world including local case studies
and regional and international perspectives
