2015 As the number of passenger cars in the world increases daily, so too does Earth's supply of parking spaces. In some cities, parking lots cover more than one-third of the metropolitan footprint--but their design and function has not been rethought since the 1950s. Here, urban designer Eran Ben-Joseph shares a different vision for parking's future--aesthetically pleasing, environmentally and architecturally responsible. He provides a visual history of this often-ignored urban space, introducing us to some of the many alternative and nonparking purposes that

parking lots have served. He shows us parking lots that are lushly planted with trees and flowers and beautifully integrated with the rest of the built environment. With purposeful design, Ben-Joseph argues, parking lots could be significant public places, contributing as much to their communities as great boulevards, parks, or plazas.--From publisher description. This book deals with the phenomenon of third language (L3) acquisition. As a research field, L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups, and with varying levels of proficiency in the target language, as well as in other non-native languages belonging to the learner's repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired

languages have a potential role to play in the process of learning a new language. In the six empirical studies, contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age, and ii) third or additional language learning by people who have previous experience of one or more non-native languages learned after the critical period. In particular, issues related to the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect, reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole, the book presents current research into third or additional language learning by young learners or adults, considering some of the most important

factors for the complex process of multilingual language learning: the age of onset of the additional language and that of previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon, and other components of a L3. The idea for this book emanates from the symposium Multilingualism, language proficiency and age, organized by Camilla Bardel and Laura Sánchez at Stockholm University, Department of Language Education, in December 2016. This book deals with the phenomenon of third language L3 acquisition

2017-11-22 Horror is one of the most enduring and controversial of all cinematic genres. Horror films range from subtle and poetic to graphic and gory, but what links them together is their ability to frighten, disturb, shock, provoke, delight, irritate, and amuse audiences. Horror's capacity to take the form of our evolving fears and anxieties has ensured not only its notoriety but also its long-term survival and international popularity. This second edition has been comprehensively updated to capture all that is important and exciting about the horror genre as it exists today. Its new entries feature the creative personalities who have developed innovative forms of horror, and recent major films and cycles of films that ensure horror's continuing popularity and significance. In addition, many of the other

entries have been expanded to include reference to the contemporary scene, giving a clear picture of how horror cinema is constantly renewing and transforming itself. The Historical Dictionary of Horror Cinema traces the development of the genre from its beginnings to the present. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries. The entries cover all major movie villains, including Frankenstein and his monsters, the vampire, the werewolf, the mummy, the zombie, the ghost and the serial killer; film directors, producers, writers, actors, cinematographers, make-up artists, special-effects technicians, and composers who have helped shape horror history; significant production companies; major films that are milestones in the development of the horror genre; and different national traditions in horror cinema - as well as popular themes, formats, conventions, and cycles. This is done through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries
